Legal: 6N 21E 8 F Out Date: Owner: NPS
222 Name: **Woodchopper 2** Cause: Lightning Admin: YCP

Narrative: Park Service personnel reported that the fire is still actively creeping and smoldering on both the eastern and western flanks where the steep slope flattens out at the top with calm winds prevailing over the entire burn. Flames were observed about 1 to 2 feet in height in the corners. Fuels on the flat are sparse small black spruce with feather moss/sphagnum moss underneath with some downed trees holding most of the heat. Very slow rate of spread, probably due to the moisture content of the moss. There was a small finger of fire (10' x 20') also located on the western flank on the flat at the top. The slope (40%) going down to the Yukon River is covered with a mixture of birch and rock scree and 1-2' flames were observed. Fire direction here is backing and there is exposed rock on the eastern flank of the steep slope.

221 Name: **Woodchopper 1** Cause: Lightning Admin: YCP

Narrative: Park Service Personnel reported. The interior of the fire had no visible smokes. The fire was GPS'd at 7.8 acres. A spot fire was discovered 300 ft. west of the head. The spot fire is roughly 25 X 10 ft. burining in white spruce and down timber. The southern flank has burned to the bank of the Yukon River. Flame lengths were very low. The fire continues to creep through surface fuels on the northern and eastern flanks. This fire will continue to be monitored.
