<b># 301</b>	Name: <b>Su River</b>		Cause: <b>Lightning</b>	Admin: <b>L&amp;W</b>

Narrative: The Su-River fire activity continues to be minimal due to cool, rainy weather over the Trapper Laker Area. Crews continue with structure protection. Hot shot crews continue direct attack along the southern edge of the fire. Four spike camps were established west of the Susitna River. Fire activity observed was mostly smoldering with no significant runs. Warming temperatures and lower humidity may increase the fire behavior over the next two days. The fire is 10% contained.

<b># 278</b>	Name: <b>Caribou Hills</b>		Cause: <b>Human</b>	Admin: <b>FOR</b>

Narrative: Due to light to moderate precipitation and heavy cloud cover smoldering and creeping was observed. Contingency lines were established on the west flank near Deep Creek. Due to firefighter efforts and cooler weather good progress was made toward containment. Shot crews worked to secure structures. Indirect dozer and hand lines were also constructed. Dozers will continue direct line construction from highlands north toward Deep Creek. Heavy loadings of beetle-killed spruce, light flashy fuels and limited accessibility to the fire area continue to hamper firefighting efforts. Numerous structures and narrow roads are a problem as well as steep terrain in the Deep Creek area.
