 Narrative: At 1336 N309VS flew surveillance and reported 50% active perimeter with creeping, backing and single tree torching in black spruce and tundra. The fire was reported at 15 acres. At 1350 one load of smokejumpers and one duck were ordered to focus on putting the perimeter out. Six smokejumpers were deployed at 1545 and reported the fire to be 50 plus acres. At 1650 IC Baumgartner reported very active fire behavior and an increase to 100 acres. He also reported that all personnel on the fire were safe but the jumpsite had been burned over. With this report it was decided to demob the smokejumpers via N16920. All resources were off the fire at 1935. Surveillance was then flown again at 2030 by N309VS who reported the fire at 2,500 acres and the closest structure(s) 3.7 miles away. (+2495)
