                                 Lon: **141:14:57.3**                      Start Date: 3/14/13                      Area: **UYD**  
                                 Legal: 002N 032E 04 F                      Out Date:                      Owner: **NCA**  
# 002                      Name: **Windfall Mountain**                      Cause:                      Admin: **Doyon**

Incident was last flown on 3/15 by detection personnel on N61473. There was a 100% active area steaming with subsurface activity. The incident is on a ridge top. Signs of erosion were observed due to the depth of the burn with two fissures on the western aspect of the ridge. Additional observations include an apparent sulfuric smell. The area within the perimeter is covered by snow. Incident is estimated at 30 acres (15+) and will remain in Monitor status.

This fire started on the morning of 4/8/13. It was reported to the SEOC by Abner Hoage, Fire Chief in Unalaska. This is his report.  
"Once the fire escaped the dump it burned in tundra and moss until it came to a mud bread near the anemometer site. The locals used a piece of equipment (backhoe) and had a fire hydrant and hose. There were 10 locals involved in the suppression effort."
