#679	Owner: STA		Admin: SMHL-Mental Health	
	Name: Caribou Creek		Cause: Human	

The Caribou Creek Fire was called into Fairbanks Area by a local pilot 1 hour after sizing it up as 1/2 an acre. Upon arrival A/A reported it as 100 acres. Six hours later, with 3 tankers and 2 scoopers working the fire and 6 smokejumpers deployed, the acreage was updated to 400 acres. Federal mining claims, a historic dredge and cabins are threatened. Due to other large high priority fires in the area one of the IC's major concerns is getting resources requested including crews and helicopters.

Daily Report From: 08/11

0.1 Acreage On 08/11

311678	Lat: 64:51:50.1	Status: U/C	Acres: 0.1	Option: Critical

Name: **Crater Creek** Cause: Human

Crews mopped up 300` in DIVS Z from H20 to H10 and continued to construct line in DIVS A. Firefighters will continue to construct and hold line. This fire is staffed with 5 Type 2 crews and 26 overhead. The fire is in a big bowl with steep terrain causing erratic winds. Fire fuel type is not conducive for immediate progressive suppression. The steep terrain and dry fuels are dictating the use of suppression crews at this time. Lack of resources hindering line construction progress.

Name: **Stuart Creek 2** Cause: Human

Warmer and drier conditions led to increased fire activity. Division M resources mopped up hotspots along the fire edge. Aerial resources were utilized for recon and bucket work on hotspots that threatened containment. Division C patrolled Quarry and Brigadier Roads, and monitored fire progression in the Stuart Creek drainage. Resources also tested site protection and water shuttling methods on military assets. Widespread fire activity within un-burned islands, some of which are near containment lines, remain a concern. Hardwoods continue to exhibit 1`-3` flame lengths with continuous active flame fronts in the leaf litter, and re-burn in previously burned areas has been observed regularly, consuming the entire tundra mat. With 70 miles of perimeter, aerial observation and timely IR data remains essential in identifying threats to containment, and essential for deploying our limited resources to the highest priority. Various military sites in and around the Impact Area remain threatened. Aerial and ground-based military training exercises are requiring extensive coordination by the IMT and military contacts. A TFR remains in place.

Today the ransition to Type 1 Team occurred at 0800 hrs. Improved visibility and reduction of wind velocity allowed for utilization of aviation resources. ICP, helibase and staging area constructed/established. The fire has escaped military restricted area, threatening numerous structures and state timber units. Observed fire behavior was running, spotting and torching. The fire has moved out of old growth timber and into open tundra, spruce and hardwoods. The fire is wind driven. Large growth is expected as weather conditions remain hot, dry and windy. Pioneer Peak IHC and 8 smokejumpers were deployed for cabin protection. Firefighters will continue to do site protection and to utilize air resources to slow the spread north. There are two hotshot crews, 2 Type 2 crews, 3 engines and several overhead assigned to this fire.
