Crews mopped up 300' in DIVS Z from H20 to H10 and continued to construct line in DIVS A. Firefighters will continue to construct and hold line. This fire is staffed with 5 Type 2 crews and 26 overhead. The fire is in a big bowl with steep terrain causing erratic winds. The fire fuel type is not conducive for immediate progressive suppression. The steep terrain and dry fuels are dictating the use of suppression crews at this time. The fire is very reliant on helicopters for supplies and potential emergency medivacs and critical to maintaining field resources. Today, 2 crews continued to mop up Div Y, 2 crews will continue to mop up Div A. Incoming ICT3 will shadow Tuesday before taking over fire on 8-14. Bears have become a nuisance around camp and on the fireline. Difficult steep terrain will continue to be a safety concern for the type 2 crews. (There are 5 Type 2 crews and several overhead that are being shared with fire #475- Joint Lake.)

Name: **Birch Creek** Cause: Lightning

The observed fire behavior was isolated and group torching, runs through black spruce, active backing, and creeping and smoldering in open areas of tundra. Numerous resources have been ordered to assist with cabin protection. A critical need for this fire is 1 Type 2 helicopter for Medivacs and operations. A transfer of command to a Type 2 Team ( IC Dan Dallas) was completed at 2200. There are 125 people on the fire, that includes 3 type 2 crews, a strike team of engines and several overhead.

**PDHK8H** Legal: 2N 6E 32 F Out Date:  
#280 Owner: MIL Admin: ARMY-U.S. Army  
Name: **Stuart Creek 2** Cause: Human

Higher humidity values kept fire activity moderate, however extremely dry fuels continued to support fire growth. Division M resources mopped up hotspots along the fire edge. Division C patrolled Quarry and Brigadier Roads, and monitored fire progression in the Stuart Creek drainage, where the fire is approaching Glacier Creek, an identified trigger point for potential aerial firing off of South Camera Road. Engines monitored site protection and continued water shuttling to support hydraulics protecting military assets. Widespread fire activity within un-burned islands, some of which are near containment lines, remain a concern. Hardwoods continue to exhibit 1`-3` flame lengths with continuous active flame fronts in the leaf litter, and re-burn in previously burned areas has been observed regularly, consuming the entire tundra mat. With 70 miles of perimeter, aerial observation and timely IR data remains essential in identifying threats to containment, and essential for deploying our limited resources to high priority areas in a timely manner. Various military sites in and around the Impact Area remain threatened. Aerial and ground-based military training exercises are requiring extensive coordination by the IMT and military contacts, and continues to be a challenge. A TFR remains in place, and was modified on 8/12 to accommodate military training and civilian air traffic.

Improved visibility and reduction of wind velocity allowed for utilization of aviation resources. The fire has escaped military restricted area, threatening numerous structures and state timber units. Observed fire behavior was running, spotting and torching. The fire has moved out of old growth timber and into open tundra, spruce and hardwoods. The fire has been principally wind driven. Large growth is expected as weather conditions remain hot, dry and windy. The fire is approximately 1.4 miles from the Tanana River as the closest threat. The Type 1 and Type 2 crews will be utilized to supplement and reinforce structure protection areas. Engines will patrol the north side of Tanana and Delta Rivers within the subdivisions. There are 2 Type1 crews, 5 Type 2 crews, 6 engines, 5 dozers, 1 Type 3 and 1 Type 2 helicopter, and several overhead assigned to this fire.

**PNHU4Q** Legal: 2S 10E 33 F Out Date:  
 #679 Owner: STA Admin: SMHL-Mental Health  
 Name: **Caribou Creek** Cause: Human

The Caribou Creek Fire continued to see fire growth. Modis imaging shows fire growth not seen yet by the IC, who estimates the fire has seen an increase of possibly 700 acres. Limited availability of resources have shifted the fire strategy to point protection only at this time. Personnel on the fire will continue to set up point protection on existing structures, as well as continue to be inserted by boat. Helicopter 212TH will sling needed supplies to the ICP. There has been continued concern from property owners in the area and multiple TFR incursions, all of which are being addressed at this time. During the next operational period, once conditions allow for a recon by the FMO and IC, further tactics will be assessed. Fire activity has moderated since the weather change has moderated the winds in the fire area. (+700)

The fire continues to creep uphill on the northeast corner and north central in Sections 16 and 15. In Section 24 where the crew is working, the fire is smoldering and creeping with occasional single tree torching. Delta #2 continued to secure and hold the west side of the finger in Section 24. Bucket support was not possible due to heavy smoke inversion. (Crew names are reflected on Moon Lake incident.)

 Name: **Moon Lake** Cause: Lightning

Divisions T and Q remained relatively quiet along the Tanana River and in the area around H-30, exhibiting creeping and smoldering fire behavior with occasional single tree torching in the interior. The northeast flank of the fire continues to back down the ridge west of H-18 with 2` flame lengths and group tree torching observed. In Division W, Gannett Glacier continued mopping up in the area around the slop over in the 2010 Eagle Trail fire scar. Upper Tanana #2 was prepositioned at Mansfield Lake to protect values at risk. Divisions T and Q were unstaffed and will continue to be monitored by air.

Assigned Crews:	Assigned:
