Isolated pockets of heat in very sheltered fuels continued to vigorously smolder throughout the burn period. At the end of the burn period, Division C had some isolated interior torching. A NIROPS IR flight has been ordered for 06.04.14 to help identify areas of concern. Divisions are being placed into monitor status as mop up standards are met. Crews, equipment and overhead are being released as incident management objectives are met. The Repair Group is starting to work on interior dozer line in Division A. Dry and warm conditions are expected Wednesday with a light marine layer moving into the area Thursday through Saturday with increased humidity and dew points. Plans are being made to transition to a Type 3 team.
