The fire was reported as a 20 x 20 smoldering area in the woods under black spruce. Two forestry engines responded with four wheelers in tow. Personnel took action on the fire, mopped it up, and called it contained and controlled. The fire will be placed in monitor status due to the size of the burn. The fire was caused from an escaped campfire.

Personnel observed the fire smoldering with some interior creeping. Lack of near by water sources and deep burning around the root systems of spruce and mixed hardwoods has slowed progress. Smokejumpers continue dry mopping up and the fire was called 100% contained at 2000. Personnel will continue to extinguish visible smokes, grid and cold trail for any remaining heat. Demobilization of resources expected on 6/11.

Minimal fire behavior occurred today. Areas of smoldering observed on the Kenai River near Torpedo Lake and along the eastern flank of the fire. Fire resources continued to monitor, mop up and repair suppression impacts. Increasing cloud cover, humidity and precipitation continued over the fire area. Fire growth was minimal; only smoldering fire behavior observed.

Cooler and damper conditions moderated fire behavior. These allowed crews to continue direct line construction working to secure slop overs and spots with the support of A/A, T-262 and T-264 and helicopter bucket operations on the northern flank of the fire. Ten smokejumpers were inserted into the Richardson/Clearwater area. At this time, the fire remains south of the winter trail. In order to meet the strategic objectives of limiting fire growth to the north and avoid affecting communities and infrastructure an increase in staffing levels is planned to meet management objectives.
