A pilot reported a fire 7-10 miles outside McGrath. H-16973 lifted from McGrath to get eyes on the fire. The fire was reported to be 5.1 acres in mixed hardwoods and spruce. Single tree torching on the east half and continuous fuel in a thick canopy. The helitack load was set down 1/2 mile from the fire and the helicopter began dropping water on the fire. The bucket work was effective and they were able to get a perimeter around the fire. Helitack load was demobilized off the fire and a transfer of command took place. Remaining personnel continued to work on the fire late into the evening and will commence operations in the morning.

Aircraft and personnel worked throughout the day to try to save the town of Nulato. By early afternoon, the fire had spotted across both the Nulato River road and the dozer line. As the tankers tried to knock down the head, and personnel extinguish the spots, it was discovered that the fire had spotted into Nulato. Crews were able extinguish the spots in Nulato, however a spot fire was able to establish itself on the other side of the structures and began to run up the hill, basically surrounding Nulato by fire. Aided by the arrival of a T1 crew securing existing barriers and performing burn out operations, the town of Nulato was secured for the night. The airstrip will be temporarily closed while the fire moves through that area.

Fire continued to grow today with erratic winds. Fire personnel worked on enforcing structure protection and creating containment lines around the perimeter. A Type 3 team was briefed and in the process of transitioning into command of the fire. The fire has burned into the Moose Creek fire. Tomorrows plan consists of establishing more lines around the fire and additional resource protection.

Fire personnel continued their burn out operations today, concentrating on the eastern side of Iditarod. Personnel tried to conduct a burnout on a different part of the perimeter, but due to weather were unable to achieve their goal. If the weather cleared up in the evening, they were going to continue with their mission. IC is expecting a minimum of two days left to accomplish complete burn out operations around Iditarod.

 Name: **Juneau Lake** Cause: Lightning

A cloud layer has continued to assist by encouraging minimal fire behavior. However, temperatures have increased and RHs have dropped somewhat today, causing single tree torching on interior islands. This trend is expected to continue tomorrow with additional clearing of the marine layer perhaps causing some increased activity on the interior of the fire. The Lolo T2IA continued with direct line construction from the anchor point on the NW corner dragging line south, and working from rock to rock. One type 3 helicopter continued to assist with crew and supply shuttles. Acreage increase is due to more accurate mapping.

 Name: **Card Street** Cause: Human

Crews in all divisions continued their work today as they have for the past two days with significant progress in mop up, gridding, patrolling and securing all control lines. Fire behavior picked up a bit today as the sun broke through the receding marine layer and things warmed up quicker than anticipated. Fire behavior is expected to increase over the next couple days due to warming temperatures, lower humidity's and a slight increase in wind over the fire area. This will result in a potential for single and group tree torching along with the possibility of creeping fires carrying more than the past couple days. The concerns with the buildup index becoming high to extreme and the same for the drought code. That will contribute to the increase in the indices which could become problematic in areas of the fire. Operations is still considering another attempt to burn and as the fuels dry out in the coming days the possibility becomes more optimistic to tie the control line to Skilak Lake. Structure protection continues with the complexities of the Wildland Urban Interface.

The fire was moderately active today, making a push toward the north east consuming roughly 6000 acres. The moderate activity was due to precipitation over the fire vicinity. Small runs group torching and continuous backing front were observed today. We established structure protection around additional perimeter cabin, resupplied Chisana with supplies from fixed wing, and had successful mapping and recon mission. Tomorrow's mission includes more structure protection on permanent cabin, recon, preparation for a possible burnout, and a mapping mission.
