 Name: **North Aniak** Cause: Lightning

The fire was flown by an IC out of Aniak at 1400. The fire was 100% active with a north wind running the fire towards the Kuskokwim River. There was no impact from the thunderstorm the night before and the fire was backing into tundra on the northern perimeter, and mixed hardwoods and spruce to the south. The fire was again flown around 1900 and was reported to have made a significant run to the south in the mixed spruce and hardwoods. Fuels normally resistant to fire are burning actively, and the fire had bumped up against the river. Salt Lake City Type 2 IA crew was mobilized into Aniak, along with the Kalskag crew to help begin site protection for the community.

Moderate fire behavior was observed with group and single tree torching. The fire did threaten cabins located on the Yukon River and resources worked to put point protection in place. A Burnout operation was completed around 1 cabin. Resources conducted size ups for 5 other cabins along the Yukon River and formulated a structure protection plan for those cabins. Crews continued to mop up. A Type 2 team is transitioning into Nulato at this time to take command of the incident.

Fire is being managed by Staats` IMT2. They reported fire growing in all directions but most of the spread is toward the southeast. They will continue with point source protection. The fire is currently 5.5 miles from the nearest native allotment which contains structure development. The fire is 9 miles away from the center of the village of Tanana, and several power lines corridors within that 4 mile distance.

The fire was reconned via helicopter to update acreage and fire behavior. The fire continues to grow mostly through creeping. The large number of people necessary to set-up protection around values at risk poses a logistics challenge when supplies move via truck and then by boat or helicopter. A type 2 incident manage team will take over the fire on 6/26. The team organization will assist in making support of field personnel go smoother. The cabins nearest the fire are being protected first. Establishing protection around Healy Village is becoming an equal priority with special consideration being given to archaeological sites.

Crews in all divisions continued their work today as they have and continue making headway in mop up, gridding, patrolling and securing all control lines. Fire behavior did pick up today as predicted with early cloud cover burning off by mid-morning. The forecast for tomorrow is for a 30% chance of rain but no chance for a wetting rain and this will result in minimal fire behavior. With that forecast in mind Operation went for the burning took the chance to pull off the burning operation today as the fuels did hit prescription and were quite successful with their efforts. The operation was successful in that they were able to tie the control lines together and bring the black line down towards the old burn and the lake. This will secure those control lines and bring a comfort level to everyone on the fire. Structure protection continues with the complexities of the Wildland Urban Interface.

J-63 was launched to recon the fire and potential threat to the Tripod Flats Cabin 5 miles east of the fire, winds were out of the northwest. At 1629 J-63 was over the Tripod Flats next to the cabin and reported there was too much smoke to commence jump operations. West winds are predicted, posing a continued threat to the Tripod Flats cabin as the fire continues to grow. An additional structure was identified further east in the path of the fire with predicted west winds. Cabin protection sprinklers remain in place on the Old Woman cabin and shelter and the fire will be flown again tomorrow. At this time the fire remains in monitor status.
