 Name: **Mishevik** Cause: Lightning

The fire exhibited slightly more fire behavior today due to weather conditions in the area. The fire had multiple active fingers, and interior heat was still being observed in many locations. The Nondalton Type 2 Crew was mobilized into place, and personnel will continue ground suppression efforts. Tentative plans for tomorrow consist of combining ground suppression efforts with aerial efforts.

 Name: **Aggie Creek** Cause: Lightning

Fire had minimal fire behavior with smoldering, creeping in surface fuels and occasional torching in black spruce. Extensive areas along the fire perimeter and within the interior contain heat but did not produce active burning. Light showers occurred in the early morning with afternoon temperatures in the low 60's and relative humidity in the 70% range. Strategic objectives are to (1)Protect all subdivisions, communities, residences, businesses, and associated infrastructure within and adjacent to the fire area. The Himalaya, Haystack Hill, and Hayes Creek subdivisions are located to the south along the Elliot Highway. The Tatalina subdivision and Community of Joy are located to the north along the Elliot Highway. (2)Reduce/negate impacts to the Elliot Highway. The highway is the only transportation corridor for critical supplies to corporations and communities to the north. (3)Protect infrastructure along the Alyeska Trans-Alaska Pipeline.

IMT2 (Hutton) Significant smoke shading minimized area fire behavior. Fire behavior was isolated heat confined to the heavy dead and down fuels. Firefighters have made significant progress continuing to secure containment lines. The heavy smoke shading prohibited safe aerial crew shuttles. The T2IA crew will continue to mop-up areas of heat and patrol for spot fires across containment lines. Firefighters will assess and prepare structures along the Yukon River northeast of the fire.

Weather concerns today were cool temperatures and high humidity again today, 68 degrees with humidity at 50%. Tomorrow highs are forecasted to be 75 degrees with 35% humidity. Continued warming expected for Monday with temperatures forecasted near 77 degrees and humidity at 33%. The Type 2 team's life, safety, and health threats are dead and down fuels, limited vehicle access to the fire, low visibility (fog) and smoke, structures in remote locations. Tourist and fire traffic on Highway 3 which is adjacent to the fire area. Wet road conditions, some roads are native surfaced wildlife.

Crews continued their work today patrolling and securing all control lines. The forecast for tomorrow calls for a 10% chance of wetting rain which will continue minimal fire behavior giving firefighters more opportunity to meet their suppression objectives. Crews patrolling around the structures remain aware of structure protection within the Wildland Urban Interface. Crews continued pulling hose and equipment off the line today and back hauling everything back to the Incident Command Post and this will be the plan for the next few days. Rehabilitation has begun on the dozer lines and other areas of the fire. The fire size remains 8,876 acres. Several resources have been re-assigned over the past few days and personnel will continue to right size the incident personnel to meet the needs. Anticipate the release of additional crew over the next couple days.

#321 Owner: State Unit: AKAKS-Alaska Forestry
Name: **Michigan Creek** Cause: Lightning

The fire management is under the control of the Southern Gold Team. An IR flight was requested. The significant concern is the spread of the fire towards Healy Village and cultural and archeological sites. The threat is minimal given current and expected fire behavior. Monitoring will be ongoing.
