Aggie Creek air attack's 1327 update: 80% of the line in Division Tango is holding. The fire did jump the retardent line in 2 spots and increased it's size to 400-500 acres, with a south wind on the fire moving Division Tango to the north with slop over and one spot by the pipeline, hitting it with helicopters where they can. Fire's perimeter will increase and nothing was threatened at the time of update. At 1552 4NC reported that there was isolated single tree torching in Division Victor, and torching in Alpha. The team is focusing on Division Victor and the needs in Division Alpha working to the west.

All fires are consuming large area of fuels today and significant acreage increase are expected once aerial observations are made or updated IR data is received. Moderate to strong East winds occurred under sunny skies. Single tree, group torching and backing downslope spread was observed as well as sustained crown runs. Flanking fire was exhibiting intermittent crown runs as well. The Spicer fire may merge with the Tozitna fire.

Due to observed fire behavior on the Hay Slough fire and predicted weather, a module boated into an area to do structure protection on a cabin inland east of the Tanana River. River operations were put on high alert as the threat to structures increased near the Moose Point, Kokerine, Blind River, Bering, Hay Slough, and Harper Bend fires. All crews were pulled back to protect structures along Site Road with the increase in fire behavior. The fire crossed both dozer lines. Long range spotting was observed.

The smoke was heavy in the Tanana area through the morning hours with slight improvement by midday. Large fire growth all around the Tanana area will likely cause visibility to reduce to .25 miles.

Note: Staats` IMT managing 9 fires: The Blind River, Spicer, Tonzitna, Harper Bend, Hay Slough, Bering Creek, Moose Point, Jackson, and Kokrine fires. These are referred to as the Tanana Area Fires.

#619 Owner: USFWS Unit: AKINR-Innokko National Wildlife Refuge  
Name: **Little Mud River** Cause: Lightning

4MN flew recon over this fire today and observed 2% active perimeter, with smoldering, creeping, backing, and some isolated torching. Fuels being consumed are black spruce, white spruce, tundra, grass, and a spruce/hardwood mix. Observer states that the fire has spotted across the Little Mud River. Majority of the smokes are interior of the fire's edge, and the green islands are smoldering.

4MN flew recon over this fire today and observed some smoldering and creeping characteristics, with black and white spruce, tundra, grass, and a spruce/hardwood mix of consumables existing. The fire has not advanced within the interior pockets, and a couple of spots on the perimeter are smoldering. The fire is staying west of the North Fork of the Unalakleet.
