At 1105 the IC declared the fire contained. Objectives for Pioneer Peak IHC, Gannett Glacier T2IA Crew and additional overhead are to plum each flank with hose and water, suppress heat along the fire's edge and grid the green for any spots culminating in 100% mop up. Command was transferred this evening and the projected demob date is 5/8.

On 5/4 a Nulato resident noticed a column of smoke on the other side of the Yukon river. On 5/5 agency aircraft 114MN flew the area, and was unable to locate the fire. Later in day, 114MN returned to updated coordinates, and located a black spot that looked to have been extinguished by the rain. The fire was estimated at 8 acres, and was put into monitor status.

N700FW flew a reconnaissance mission today over the Oklahoma prescribed fire area. No smokes were visible along the perimeter of the project area. One smoke was still present near the two lakes in the SW corner which is well within the interior of the project. There are no threats to the fireline. The prescribed fire will remain in monitor status.
