The fire was 30-40% active with the northern perimeter showing the most activity. Fire behavior included isolated torching with backing and creeping. Isolated torching was observed through the fire in pockets of spruce. Fire activity has started to moderate with overcast skies and higher relative humidity coming in, minimal growth is anticipated. Structure protection has been completed at cabin site and crews continue to work on allotments to the south. Overhead transition will take place tomorrow with smokejumpers being demobilized.
