	Name: Mountain Village Dump		Cause: Human	

The fire was called in by a local Mt Village resident as an escaped dump fire heading toward the village. Air attack was redirected and upon arrival reported the fire to be on the west side of town running up a hill in tundra and estimated 10 acres in size. With the winds out of the southwest and the fuels ahead of it being shaded alder brush, air attack felt the fire would die down significantly. Because no resources were available no action was taken this evening.

The fire is actively burning to the north, east and west at a moderate rate of spread. The south and southwest flanks of the fire continue to back at a low rate of spread due to the lighter and sparser fuel types. The Kako Retreat Center is currently 8.55 miles away from the southwest edge of the fire. Two firebosses and air attack were dispatched at 1900 hours to work the south and southwest flanks of the fire to slow growth towards the retreat. Due to poor visibility detection aircraft OPE was unable to get an accurate size. Using MODIS the fire is estimated at approximately 6,500 acres.

The fire continued to smolder and creep in the northern portion, and was still showing isolated pockets of heat between H-5 and H-15. Helicopters were utilized to move White Mountain crew to H-15, where they will continue to work towards the west identifying hot spots. The rest of the crew personnel are continuing to work towards their site protection goals. Tentative demobilization is scheduled to begin on 6/12.
