The fire became very active this afternoon and while USFWS FMO was flying detection for the Galena zone. He observed a spot established on the southern side of a waterway management had hoped to use as a natural barrier to keep the fire from endangering an allotment. The spot went from .10 acre to 1 acre in the two orbits it took to establish lat/long coordinates. Smoke jumpers were launched, after further assessment of the resources at risk, and discussion with the jurisdictional FMO the decision was made not to deploy as the allotment was not imminently threatened tonight. Management will re-access tomorrow on further action needed. The fire size at time of observation was 15,000.
