Locals from Mt. Village called at 1755 reported the fire outside the confines of the dump. J-66 was requested to respond to the fire along with ASM A-4, FB-208, and FB-209. At the time of size up by J-66, it was discovered this fire was previously contained at 37.5 acres, but given recent weather conditions it has grown approximately 120 acres in size and had a 100% active perimeter. The fire was running and torching with 2-4 foot flame lengths. The fire is spreading quickly in an easterly direction with grass and brush as the predominant fuel type. The origin looks too be on the road next to the dump. It is burning on the upper, middle, and lower 1/3 of the slope. The slope of the fire has a southerly aspect and is very steep.
