 Name: **Pilot Mountain** Cause: Lightning

J-17 reported the fire on Pilot Mountain. The fire was 1/10 of an acre with a high rate of spread uphill toward an antenna. To protect the antenna, the DO requested jumpers to take action. The jump ship could not complete jump ops because of thunder cell in the area. They returned back to Galena to wait out the weather. The DO requested to launch AA and two Firebosses from Galena to the fire. J-17 responded later and put four jumpers on the ground.

Several callers to dispatch reported seeing smoke column from mile 94 of the Richardson Highway. At 1755 detection aircraft 840AK flew the fire and reported it was .25 acres in continuous black spruce. At 1837 helicopter 811KA flew the fire on their return from fire 418. 811KA reported fire to be 10 acres and 100% active, moving to the west. No values at risk were identified. This fire is located in a Limited management suppression area and no action was taken. Fire will continue to be monitored.

 #470 Owner: ANCSA Unit: AKVLN-Tetlin Village Tribal Council  
 Name: **Tok River** Cause: Lightning

A fire was reported by the local timber company at about 1700. The fire was observed to be extreme in behavior with strong, erratic winds causing the direction to change frequently. The fire also grew dramatically in the first couple hours. Flame length was observed at 50 to 75 ft. Helicopter 230 was launched to the fire along with two Forestry engines. 230 landed at a helispot, but had to abandon the spot due to erratic winds causing the fire to change direction and burn over the spot shortly after the helicopter left. A type 3 IC took over the fire and air support was ordered. Due to larger fires in other zones air support was not available till close to end of shift. The fire is east of the Tok River, but has potential to cross the river during the hot and drying trend. If the fire does cross the river the Tok Cutoff and the community of Tok could be threatened. Plans for next operational period include additional air support and plugging in more crews.

The fire was reported by 909AK as 15 acres, rank 3, 100% active in black spruce and tundra. The fire was creeping and smoldering with intermittent single tree torching at the head. One cabin was located to the north about a half mile, but was not immediately threatened at that time. Due to an increase in fire behavior, helicopter 212HL was launched from McGrath, and dropped off 4 people to begin site protection on the nearby cabin. By evening, the squad had accomplished a 30 foot defensible space around the cabin.

Fire activity was moderate with single tree torching, creeping and smoldering. There was a significant lightning storm in the area creating down drafts that pushed the containment lines but no acreage was gained. The Tanana Chiefs T2IA crew was reassigned to a higher priority fire which will delay containment date. With additional resources expected to arrive tomorrow, containment is expected within 72 hours.

J-17 was launched from McGrath at 1045 to the fire with plans to deploy a couple jumpers. Due to the high levels of statewide activity, J-17 was requested to return back to McGrath and to not take action on the fire. The fire was later flown by aircraft 9602F and sized up at 75 acres, 50% active and burning in tundra. The fire appeared to be boxed in by rocks, and is not expected to grow exponentially. Due to limited resources, no action was taken on this fire and it will continue to be monitored daily.

The fire was flown by J-17 who reported it to be rank 3, burning in tundra, grass, and black spruce. The fire was creeping and running in patchy fuels with winds 5 to 7 out of the east, pushing the fire west and backing into empty allotments. The fire will be placed in monitor status due to limited resources and high levels of state activity. Resources will be used for life safety and values at risk. This fire will be monitored daily.
