

MT-1X Reserve Parachute Rigging Manual

compiled March 1998
FART

Rigger Information and notes

The BLM uses an MT-1S 270 sq. Ft. 5-cell ram-air manufactured by Paraflite as its reserve canopy

Reserves are to be rigged only in a loft, and only on a table designed to rig square parachutes.

Before beginning rigging make sure you have all the tools required for rigging.

Count your tools, including pens, before and after rigging to ensure that there are no temporary pins or other tools left in the pack that could cause a malfunction.

The service life on BLM reserve parachutes is 10 years.
