

Wildland Fire Updates

June 19, 2013
Last Updated: 11:21 a.m.

Contacts
Report Fires: 911
AFS/DOF Public Affairs: (907) 356-5511

Future updates will be provided when significant changes in activity occur.

Kanuti Fire – off of Chena Hot Springs Road

The Kanuti (name change from the original Kaouti) Fire that started around mile 17 of Chena Hot Springs Road on the afternoon of June 17 is an estimated 120 acres. There are no evacuations in place and no structures have burned in the fire. Traffic is allowed in both directions on Chena Hot Springs Road; however, depending on fire activity today, there could be unplanned delays. People are asked to maintain awareness of their surroundings at all times when in the mile 15-17 vicinity, and to drive slowly around firefighters and equipment working along the road.

The fire is burning in a populated area, and in some cases, very near to homes. It was a big effort yesterday to knock it down and start to secure it on Monday evening. While progress has been made, there is still fire on the landscape. People are asked to please stay out of area that had fire in it or is burning as conditions may be unsafe; stay out of the way of firefighters so that they can continue to make progress. Firefighters will work today to secure fireline around the fire. Crews assigned include: Delta #1, North Stars, Pioneer Peak, Tanana Chiefs, White Mountain.

A Temporary Flight Restriction is in place and pilots are advised to check NOTAMS.

It is expected to be another hot, dry day and conditions could change quickly and new fires can start. While we are making progress on the fire, it is important that residents still consider emergency planning measures. Information about emergency planning can be found in the Wildland Fire Guide at http://forestry.alaska.gov/pdfs/Alaska_Wildland_Fire_Guide_2013.pdf on page 7.

We will be providing new information as we get it throughout the day. The primary source for fire information will continue to be <http://fire.ak.blm.gov>.

Our call volume in the Fire Information Office at 907-356-5511 is heavy and we are working to keep up. If you do not reach us initially, please call back.

6 /19 - Red Flag Warnings

Red Flag Warnings continue across the state for low humidity in western and interior Alaska and for winds in the Copper River Basin. A Red Flag Warning means that conditions are occurring, or will occur, which could lead to the development of large and dangerous wildfires. Human-caused starts are of major concern given the low potential for lightning forecasted. More information about the warnings is available at: <http://firewx.arh.noaa.gov/warnings.php>.

Fire Activity

Warm dry temperatures are forecasted for much of the state through the week. High lightning activity is forecasted for

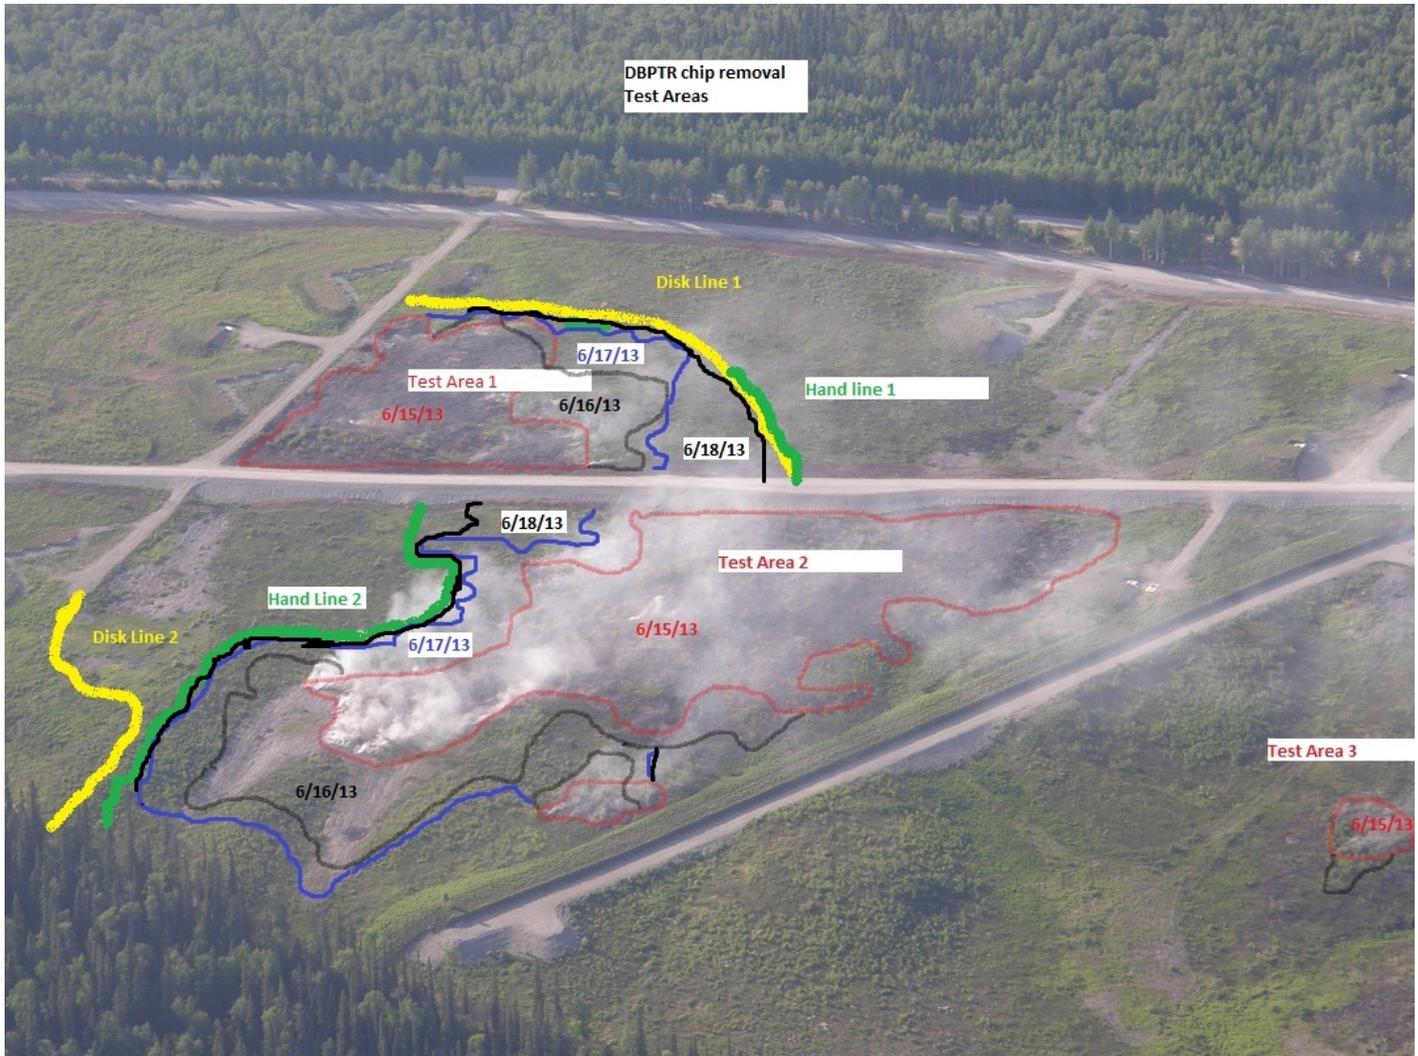

Friday, June 21. While wildland fire managers are paying close attention to lightning forecasts, the most probable source of dangerous fire potential continues to be human activities. Please use caution with anything that could start a fire and adhere to Alaska Division of Forestry burn permit guidelines and suspensions for debris burning. More information on debris burning is available at <http://forestry.alaska.gov/burn>.

6/19 - North Fork Chandalar Fire #245

The North Fork Chandalar Fire is 90 percent contained.

6/19 - Fairbanks and nearby areas

Fort Wainwright Fire Department, Fort Wainwright Range Control, and AFS fire personnel were able to improve containment lines around the test areas to deal with the hot and dry conditions. Smoke may be visible from Eielson AFB, Two Rivers, North Pole, Salcha area and Alaska Hwy 2. The smoke generated from this process may last throughout the summer.

6/18 Fire Information

As of today, according to the AICC a total of 234 fires have burned 145,042 acres statewide this year. Refer to AICC Situation Report for additional information: <http://fire.ak.blm.gov/content/aicc/sitreport/current.pdf>. Fire- related news releases are posted at <http://fire.ak.blm.gov/newsroom.php>.
