A weekend update will not be provided unless significant changes in activity occur.

The Fair Time of Year

The Tanana Valley Fair is taking place from August 2-11 in Fairbanks. If you attend, please visit the Society of American Foresters (SAF) and State of Alaska log cabin booth (pictured at left). Firewise brochures are provided along with information about wildland fire preparedness, emergency planning, and response. Additional events are happening statewide this month where you can go to obtain wildland fire information and talk with fire personnel. Some of the events include: Kenny Lake Fair (August 16-17), Kenai Peninsula Fair (August 16-18), and the State Fair in Palmer (August 22-September 2).

8/2 Statewide Fire Information

It is critical to prevent human-caused fires as there is significant potential for increased activity and rapid fire growth throughout Alaska. Firefighting personnel and aircraft continue to work diligently on existing fires. New fires are expected to occur under the warm, dry conditions and preventing new fires helps reserve resources for situations that are non-preventable, such as lightning-caused fires.

A Red Flag Warning for strong southerly winds is in effect from Friday morning until midnight Saturday in the Deltana and Tanana Flats area and the eastern Alaska Range. A Red Flag Warning means conditions support the development of large, dangerous wildfires. For a map of current Watches and Warnings, visit <http://firewx.arh.noaa.gov/warnings.php>.

Alaska Division of Forestry Areas that are hot, dry and wind may have Burn Permit Suspensions in place. If you plan to burn debris, make sure you have a permit and follow safe burning guidelines. Learn more at <http://forestry.alaska.gov/burn>.

Eight new fires were reported Thursday to the Alaska Interagency Coordination Center. Three human-caused fires started, two on the Kenai Peninsula and one in southeast Alaska, while five lightning-caused fires started, two in the Copper River Basin and three in the southwest.

For a map of lightning strikes statewide visit <http://fire.ak.blm.gov/predsvcs/maps.php> and “current lightning.” Fire managers continue to fly detection in areas that have received lightning to look for new fires and potential holdover fires. Holdover fires are from strikes that personnel believe to have occurred in days past, but are just now becoming fires that are visible enough to be detected.

A total of 76 fires are active statewide; six are staffed. According to the Alaska Interagency Coordination Center, so far this year 545 fires have burned 1,082,714 acres statewide. Information about individual fires is at <http://fire.ak.blm.gov/content/aicc/sitreport/current.pdf>.

Fire Information Gathering

Smoke can pose health concerns for the public. Visit the “Protect Yourself from Smoke” website for information at <http://www.cdc.gov/Features/Wildfires/>. Keep informed of local fire information sources and air quality reports. The Alaska Department of Environmental Conservation has smoke information at <http://www.dec.state.ak.us/air/am/smoke.htm> and <http://dec.alaska.gov/air/smokemain.htm>. For “Frequently Asked Questions” visit http://www.dec.state.ak.us/air/smoke_ga.htm.
