Report Fires: 911
AFS/DOF Public Affairs: (907) 356-5511

A weekend update will not be provided unless significant changes in activity occur.

8/4 State Fire Activity Increases

The forecast for high temperatures, dry fuels and high winds have proven to be true as new fires and increased activity on existing fires impacted areas around the state. A summary of fire activity is listed on the AICC Situation Report: <http://fire.ak.blm.gov/aicc.php>.

8/4 Stuart Creek 2 Fire

Burnout operations were completed along the southern perimeter of the fire. Resources continue to patrol and monitor the perimeter around the Chena River. There are 125 personnel on the fire as mop-up and rehabilitation efforts continue. Photo by James Sullivan

8/2 The Fair Time of Year

The Tanana Valley Fair is taking place from August 2-11 in Fairbanks. If you attend, please visit the Society of American Foresters (SAF) and State of Alaska log cabin booth (pictured at left). Firewise brochures are provided along with information about wildland fire preparedness, emergency planning, and response. Additional events are happening statewide this month where you can go to obtain wildland fire information and talk with fire personnel. Some of the events include: Kenny Lake Fair (August 16-17), Kenai Peninsula Fair (August 16-18), and the State Fair in Palmer (August 22-September 2).

8/2 Statewide Fire Information

It is critical to prevent human-caused fires as there is significant potential for increased activity and rapid fire growth throughout Alaska. Firefighting personnel and aircraft continue to work diligently on existing fires. New fires are expected to occur under the warm, dry conditions and preventing new fires helps to reserve resources for situations that are non-preventable, such as lightning-caused fires.

Alaska Division of Forestry Areas that are hot, dry and wind may have Burn Permit Suspensions in place. If you plan to burn debris, make sure you have a permit and follow safe burning guidelines. Learn more at <http://forestry.alaska.gov/burn>.

For a map of lightning strikes statewide visit: <http://fire.ak.blm.gov/predsvcs/maps.php> and “current lightning.” Fire managers continue to fly detection in areas that have received lightning to look for new fires and potential holdover fires. Holdover fires are from strikes that personnel believe to have occurred in days past, but are just now becoming fires that are visible enough to be detected.

A total of 82 fires are active statewide; five are staffed. According to the Alaska Interagency Coordination Center, so far this year 561 fires have burned 1,123,653 acres statewide. Information about individual fires is at <http://fire.ak.blm.gov/content/aicc/sitreport/current.pdf>.

Fire Information Gathering
