INCIDENT MANAGEMENT SITUATION REPORT
Thursday 06/24/93 0530 MDT
Preparedness Level II

ALASKA: Initial attack activity.

NORTHWEST: Initial attack activity.

CALIFORNIA NORTH ZONE: No significant activity.

CALIFORNIA SOUTH ZONE: Initial attack activity.

NORTHERN ROCKIES: Initial attack activity.

EASTERN GREAT BASIN: Large fire activity.

MILL CREEK, Cedar City District, BLM - 2,300 acres.
Controlled.

WESTERN GREAT BASIN: Initial attack activity.

SOUTHWEST: Initial attack and large fire activity.

GRAHAM COMPLEX, Coronado NF - 600 acres. Type I Team (Shaw) committed. The complex consists of the GRANT HALL, GRAPEVIEW, HELIOGRAPH, NOON, and TWILIGHT fires. Control problems include steep terrain and very heavy fuel loading. Significant progress was made in holding control lines, utilizing helicopter bucket work. Containment expected today, 6/24.

CEDAR WASH, Arizona Strip District, BLM - 7,407 acres. Controlled.

PARK, Las Cruces District, BLM - 2,240 acres. The fire is burning in a rugged area of the Animas Mountains. Containment expected today, 6/24.

CROSBY, Cibola NF - 106 acres. Flashy fuels and winds are impeding control efforts. No estimate of containment.

BEAR, Roswell District, BLM - 500 acres. Control problems due to erratic winds and very steep terrain. Containment expected 6/27.

HOT DOG, Arizona State - 640 acres. Controlled.

ROCKY MOUNTAIN: Initial attack activity.

EASTERN: No activity.

SOUTHERN: Large fire activity.

GNAT CATCHER, Okefenokee NWR - 5,711 acres.
Containment expected 6/26.

CANADA: Initial attack and large fire activity.

DEER, Saskatchewan - 308,875 acres. No estimate of containment.

SHALLOW LAKE, Manitoba - 173 acres. No estimate of containment.

ANALYSIS: The Southwest Area experienced moderate initial attack activity, while good progress was reported on most large fires. Resource movement within the area was moderate with demobilization and reassignment of crews and overhead. Moderate initial attack activity continued in southern California.

PROGNOSIS: A RED FLAG WARNING has been issued in the Sacramento Valley, Mendocino NF, and areas of the west coast for strong north to east winds, hot temperatures and low humidities. Increased initial attack is anticipated in South Zone. Most of Arizona and New Mexico will continue to be hot and dry. Northeast and central New Mexico will see cooler temperatures and some isolated thundershowers which should minimize new starts and aid in the containment of existing fires.
