JUNIPER, Ocala NF - 1,150 acres. There is a black line around the entire fire, but increased winds could threaten the line. Containment expected 8/5.

ANALYSIS: Activity continued in the Southwest Area, California, Colorado and the Great Basin due to persisting hot, dry weather conditions and thunderstorm activity.

PROGNOSIS: Potential continues for increasing initial and extended attack fires due to forecasted scattered thunderstorms coupled with high temperatures in the Southwest, Great Basin, California and Rocky Mountain Areas. Activity in Alaska will moderate due to cooler temperatures and increased clouds and rain. Initial attack activity will continue in the Southern Area, due to high temperatures, and drought conditions in several areas.
