INCIDENT MANAGEMENT SITUATION REPORT

Thursday 12/93 0530 MDT

Prepare as Level II

**ALASKA:** Large fire activity.

B248, Tanana Zone, Alaska State - 36,250 acres. No estimate of containment.

**NORTHWEST:** Initial attack and large fire activity.

LOOKUP, Wentachee NF - 116 acres. Type II Team (Murphy/Berndt) committed. The fire is located in the Tumwater Canyon area of the Leavenworth Ranger District. Current threats are to private land and structures. Poor access, steep terrain, and rolling burning debris are hampering suppression efforts. Containment expected 8/13.

**CALIFORNIA NORTH ZONE:** Initial attack activity.

**CALIFORNIA SOUTH ZONE:** Initial attack activity.

**NORTHERN ROCKIES:** Initial attack activity.

**EASTERN GREAT BASIN:** No significant activity.

**WESTERN GREAT BASIN:** Initial attack activity.

**SOUTHWEST:** Initial attack activity.

CORNER, Arizona State - 175 acres. Contained.

**ROCKY MOUNTAIN:** No significant activity.

FLOOD ASSISTANCE, Topeka, Kansas. The Rocky Mountain Area has established a Receiving and Distribution Center in eastern Kansas.

**TERN:** No activity.

FLOOD ASSISTANCE, Shawnee NF - Type II Team (Adams) committed. The river continues to slowly recede. Team continues to provide communications for levee personnel and information to the public about flood related activities.

**SOUTHERN:** Initial attack and large fire activity.

TATES HELL, Florida State - 800 acres. Controlled.

NINE POINT ONE, Merritt Island, NWR - 540 acres. Contained.

**ANALYSIS:** Fire activity continued to be scant throughout the western U.S. for this time of year. The Southern Area, on the other hand, continued to experience above normal fire activity.

**PROGNOSIS:** A RED FLAG WARNING has been issued for Arizona for strong gusty winds and low humidity. Scattered showers and thunderstorms will continue for the Great Basin, Southwest, Rocky Mountain, and Southern Areas. This weather pattern should minimize new starts and aid in the containment of large fires. Northern California will have a slight increase in initial attack activity due to holdover fires from yesterdays lightning activity.
