**INCIDENT MANAGEMENT SITUATION REPORT**  
**TUESDAY 06/07/94 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL I**

**Current Situation:** The Southwest Area continued to experience large fires with good progress being made towards containment on most of them. Minimal activity was reported from the other areas, except southern California which reported one fire that was contained.

The Miller fire with Type I Incident Management Team (Denton) committed, is located approximately 12 miles south of Sierra Vista, AZ. A new start briefly threatened homes but was successfully stopped before causing any damage.

The Hassayampa fire has a handline around it and is reported to be looking good with containment expected this morning. There is no longer a threat to the communities of Groom Creek and Walker.

The Mule fire reported good progress in line construction and burn-out operations. Unburned islands in the interior of the fire are putting up considerable amounts of smoke.

**Outlook:** Florida will be partly cloudy with scattered afternoon and evening thundershowers. Arizona and New Mexico will be mostly sunny with winds 15-25 MPH, and relative humidities of 5-20%. Southern California will be mostly sunny with west to north winds 15-30 MPH over the mountain ridges and eastern deserts. Expect continued fire activity in the south western states.
