INCIDENT MANAGEMENT SITUATION REPORT
SUNDAY 06/12/94 0900 MDT
NATIONAL PREPAREDNESS LEVEL II

Current Situation: Higher humidities and some precipitation aided control efforts on large fires in the Southwest Area. Initial attack was minor with new starts caught at minimal acreages.

Southwest Area Fires:

BRIDGE, Lincoln NF. Type I Incident Management Team (Shaw) committed. Higher humidities have helped reduce spotting, though thousand hour fuels continue to burn actively. Thunderstorm down drafts keep the potential for reburn high. Extensive mop-up is in progress. Release of resources will begin today.

MARCUS, Guadalupe NP. Type II Incident Management Team (Bedlion) committed. A historic sheep shearing pen and shade shelter have been lost. Suppression tactics have been aided by thunderstorm precipitation and higher humidities. Successful completion of confinement objectives are projected for today. Mop-up and rehabilitation activities will continue.

RYAN COMPLEX, Cibola NF. Type I Incident Management Team (Denton) committed. Crews on the Ryan fire are continuing to improve firelines and work hot spots. On the Coffee Pot fire a burnout operation of 9.4 miles was completed. Some demobilization will begin today.

MONARCH, Phoenix District, BLM. Fire is in mop-up phase. Containment is expected today.

SYCAMORE, Phoenix District, BLM. Fire is in mop-up phase. Control is expected today.

Outlook: Continued hot and dry in Arizona and New Mexico with isolated to scattered afternoon thunderstorms. A possibility of very strong winds in New Mexico. Sunny and dry in southern California and into Nevada. Potential for initial attack and large fire activity still exists in the Southwest Area.
