NORTHERN ALASKA FIRE WEATHER FORECAST FOR WEDNESDAY, JUNE 15 1994
NATIONAL WEATHER SERVICE FAIRBANKS ALASKA
ISSUED 9:30 AM ADT WEDNESDAY

OTHER SYNOPSIS AND MAP DISCUSSION.
UPPER LEVEL TROUGH MOVING INTO ALASKA FROM THE NORTHWEST HAS
PUSHED THE UPPER LEVEL RIDGE SOUTHEAST OVER THE COPPER RIVER
BASIN. THIS TROUGH IS BRINGING COOLER AND WETTER WEATHER FIRST
IN THE WEST THEN PROGRESSING EAST THROUGH THE DAY. SUFFICIENT
UNSTABLE CONDITIONS STILL EXIST FOR THUNDERSTORM DEVELOPMENT OVER
THE SOUTHEAST INTERIOR FROM CIRCLE SOUTHEAST AND FAIRBANKS EAST.
BY THIS EVENING THE UPPER LEVEL TROUGH WILL BE OVER THE WESTERN
INTERIOR AND CAUSING WIDESPREAD LIGHT RAIN IN THE TANANA ZONE
WEST, THIS TROUGH WILL CONTINUE EAST AND BRING SHOWERS TO THE
EASTERN INTERIOR THURSDAY.

UPPER YUKON ZONE AND NORTHERN REGION
CLDS/WX..PARTLY TO MOSTLY CLOUDY WITH AFTERNOON SHOWERS.
MAX. TEMP..68-80.
MIN. RH..30%-40%
WIND..WEST TO SOUTHWEST 10-20 MPH.
TSTMS..ISOLATED IN THE UPPER YUKON ZONE FROM CIRCLE SOUTHEAST.
WIDELY SCATTERED IN THE NORTHERN REGION FAIRBANKS EAST.
#D 940615

INCIDENT MANAGEMENT SITUATION REPORT

WEDNESDAY 06/15/94 0530 MDT

NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack and large fire activity increased in Colorado and Utah. A Type I Crew and a Caterer were mobilized through NICC to Colorado. Two Type I Crews, a Caterer, Showers and Communications equipment were mobilized through NICC to Utah. Increased initial attack in Alaska necessitated the mobilization of miscellaneous overhead through NICC. High winds on fires in the Southwest caused control problems and delays in containment targets.

DIVIDE CREEK, Colorado State. Type II Incident Management Team (Hart) committed. The fire is burning in sagebrush and grass and is threatening structures. Erratic winds coupled with hot and dry conditions are hampering control efforts.

CARIN, Rocky Mountain NP, NPS. High winds caused the fire to escape the confine/contain lines. Additional resources are on order. A Type II Incident Management Team is being considered.

BRIDGE, Lincoln NF. Type I Incident Management Team (Shaw) committed. Winds up to 20 MPH fanned the fire yesterday, delaying containment. Helicopter water drops were used extensively to keep the fire from crossing the fire line and on unburned islands of fuel in the interior.

RYAN COMPLEX, Cibola NF. Type I Incident Management Team (Denton) committed. Thunderstorm activity over the fires caused suppression difficulties, causing the fire to escape fire line on both the Ryan and Coffee Pot fires. Erratic winds and heavy mixed conifer fuels are making line construction difficult. Five crewmembers were forced to deploy fire shelters on the Coffee Pot fire. All five firefighters escaped with no injuries. Additional resources are being ordered.

FLAT COMPLEX, New Mexico State - Type II Incident Management Team (Blackwell) committed. Good progress was made on all of the fires yesterday. Reduced acreage is due to remapping and less area involved in the burn-out on the Center Fire. Demobilization is to begin today.

WILLOW BASIN, Utah State and Manti-Lasal NF - Type I Incident Management Team (Birch) committed. The fire made a major run yesterday going from 50 acres to 2,000 acres in 3 hour period. Anticipated threats are to several mountain cabins and a Forest Service Guard Station in the direct path of the primary fire spread.

LAKELAND, California State. The fire is located in the Squirrel Mt. Valley near Lake Isabella. One residence has been destroyed, and several damaged. The fire is threatening approximately 200 structures. High winds are predicted to continue.

Outlook: A RED FLAG WATCH has been posted for Arizona, southern Utah, and southern Nevada for strong winds and very low relative humidities. Initial attack and large fire activity is expected to increase in the Great Basin. Hot, windy and dry in Arizona. Hot, dry and breezy in New Mexico with isolated afternoon and evening thunderstorms. Sunny, windy, and very warm in Colorado with southwest winds gusting to 40 MPH. Hot, dry and windy in the southern half of Utah and Nevada. Sunny and warm in southern California with very low humidities in the interior deserts. Fire activity is expected to increase in all the Areas above due to weather conditions.
