	T21N R019E S35	F						06/15/94
	06/15/94 FIRE WAS REPORTED BY J-52 WHILE ON PATROL. IT WAS 2 ACRES, IN BLACK SPRUCE, 100% ACTIVE, PUSHED BY A 10 MPH WEST WIND. J-52 PUT ALL 7 SMJ'S ON THE FIRE AND J-48 ADDED 8 MORE SMJ'S. AIR ATTACK 2, T124, AND HELICOPTER 116 WITH A BUCKET AND 6 FSS ALSO RESPONDED. THE FIRE GREW RAPIDLY UNTIL A RAIN SQUALL MOVED IN AND DRENCHED THE AREA. AFTER THE RAIN THE DECISION WAS MADE TO HIRE CREWS TO REPLACE THE SMOKEJUMPERS. AN ORDER FOR 5 TYPE II CREWS WAS MADE AND THE CREW SHUTTLE BEGAN LATE IN THE EVENING. RADIO COMMUNICATIONS WITH FT. YUKON WERE ESTABLISHED.							
A334	6606 14825	UYT	FWS	YKF	L	60.0	U/U	LIM
	T15N R004W S21	F						06/15/94
	06/15/94 FIRE WAS REPORTED BY A PRIVATE AIRCRAFT, THEN FLOWN BY ZONE DETECTION. AT 1907 HRS., THE FIRE WAS REPORTED TO BE 60 ACRES, BURNING SLOWLY TO THE NORTH AND WEST IN BLACK SPRUCE, TUNDRA AND GRASS. THERE ARE LAKES AND SLOUGHS IN FRONT OF THE FIRE.							
A339	6638 14349	UYT	NCA		L	0.3	S/U	FUL
	T21N R018E S22	F						06/15/94
	06/15/94 FIRE WAS REPORTED BY ZONE DETECTION AS 0.3 ACRES, BURNING IN HARDWOODS, 50% ACTIVE, NO WIND AND BURNING IN AN OLD LAKE BED. HELITACK RESPONDED OUT OF FT. YUKON.							
A340	6639 14338	UYT	NCA		L	0.1	S/U	FUL
	T21N R000E S00	F						06/15/94
	06/15/94 FIRE WAS REPORTED BY ZONE DETECTION AS 0.1 ACRE, SMOKING IN HARDWOODS, WITH NO VISIBLE FLAME. I.A. WAS DONE BY A HELITACK CREW THAT WAS BEING DEMOED FROM FIRE A320 TO FT. YUKON.

SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS
 NATIONAL WEATHER SERVICE ANCHORAGE ALASKA
 900AM ADT June 16,1994 FORECAST FOR TODAY

...WEATHER SYNOPSIS AND MAP DISCUSSION...

A WEAK COLD FRONT AND ASSOCIATED UPPER LEVEL TROUGH EXTENDS FROM UPPER YUKON AREA ACROSS EASTERN MATSU AND KENAI AREAS TO KODIAK ISLAND. THIS SYSTEM IS MOVING TO THE EAST. A HIGH PRESSURE SYSTEM ALONG THE ALEUTIANS RIDGES NORTHWARD OVER THE BERING SEA AND INTO SOUTHWESTERN ALASKA. HIGH PRESSURE IS ALSO OVER THE WESTERN GULF OF ALASKA WITH ITS EASTERN EXTENSION TO THE SOUTH OF THE SOUTHEAST PANHANDLE. LOW PRESSURE IS ALONG THE NORTHWEST CANADIAN-ARCTIC COASTAL AREA. ANOTHER LOW IS TO SOUTH OF THE CENTRAL ALEUTIANS.

SCATTERED SHOWERS SHOULD OCCUR ALONG AND EAST OF THE FRONT ACROSS SOUTHERN ALASKA FROM THE MATSU...KENAI PENINSULA AND KODIAK ISLAND AREAS EASTWARD OVER THE SOUTH CENTRAL COAST AND COPPER RIVER AREAS TODAY. SCATTERED AFTERNOON AND EVENING THUNDERSTORMS SHOULD DEVELOP IN THIS SAME AREA WITH MOST ACTIVITY AROUND AND NEAR MOUNTAINS. A FEW LINGERING SHOWERS SHOULD ALSO OCCUR BEHIND THE FRONT MAINLY ALONG OR NEAR THE ALASKAN RANGE OVER PORTIONS OF THE KUSKOKWIM VALLEY AND BRISTOL BAY COASTAL AREA. SHOWERS AND THUNDERSTORMS SHOULD OCCUR A BET FURTHER EAST DURING FRIDAY.

...MCGRATH ZONE INTERIOR...

.CLDS/WX...CLOUDY WITH A FEW SHOWERS OVER THE EAST. HIGHS IN THE 60S. WEST WINDS AROUND 10 MPH.

.TSTMS...NONE.

INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY 06/16/94 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Large fire activity increased in Alaska, the Rocky Mountain and the Southwest Areas. One Type I crew was mobilized from the West Great Basin to the Rocky Mountain Area. Four Type III and Three Type II Helicopters, a Caterer, Shower and a ATMU were ordered for the Southwest Area. The Southwest will be prepositioning smokejumpers, with aircraft, from the Northern Rockies and the Northwest at a satellite base. South Zone has had frequent use of their airtankers on initial attack fires.

Rocky Mountain Area Large Fires:

CAIRNS, Rocky Mountain NP, NPS. This fire is being suppressed under confine/contain strategy. Natural barriers are being used and handline construction is being kept to a minimum. This will be the last report unless significant activity occurs.

DIVIDE CREEK, Colorado State. Type II Incident Management Team (Hart) has been demobilized and reassigned to the Rock Creek fire.

GUERNSEY, Wyoming State. The fire is located in Guernsey State Park. No other information available.

ROCK CREEK, Routt NF. Type II Incident Management Team (Hart) committed. No other information available.

Southwest Area Large Fires:

PIGEON, Gila NF. Type I Incident Management Team (Shaw) has been reassigned from the Bridge fire. The fire is located in the Aldo Leopold Wilderness and is threatening spotted owl and gila trout habitat. The fire is burning in heavy spruce, fir, aspen, ponderosa pine and brush. Heavy use of airtankers failed to stop the fire as it doubled in size hourly yesterday.

BRIDGE, Lincoln NF. Type II Incident Management Team (Bedlion) has been reassigned from the Marcus fire. Erratic winds (30+ MPH) continued, exposing hot spots within the unburned islands. Mop-up and patrol is continuing to strengthen the control lines.

SPRUCE, Gila NF - A Type II short Incident Management Team has been ordered. No other information available.

RYAN COMPLEX, Cibola NF. Type I Incident Management Team (Denton) committed. The Ryan fire is 80% contained, line was completed around the escaped portion. The Coffee Pot fire is 70% contained. Crews are constructing a contingency line around the fire in preparation for a new strategy. Logistic support is extremely slow due to a lack of roads and trails.

FLAT COMPLEX, New Mexico State - Type II Incident Management Team (Blackwell) The fire has been contained and demobilization is expected to begin today.

WILLOW BASIN, Utah State and Manti-Lasal NF - Type I Incident Management Team (Birch) committed. Ten structures were saved, however, the fire continues to threaten more structures. Erratic fire behavior in pinon-juniper, oak brush and ponderosa pine occurred due to high winds, low relative humidity and high temperatures.

California Large Fires:

LAKELAND, California State. The fire is located in the Squirrel Mt. Valley near Lake Isabella. Two residences have been destroyed, and five damaged. Several sheds and outbuildings have been destroyed. The fire is threatening approximately 200 structures. The north flank of the fire is contained by the lake while the south flank presents difficulty for containment.

Alaska Large Fires:

413212, Alaska State. Type II Incident Management Team (Dash) committed. The fire is burning approximately 4 miles from the Alcan Hiway and burning parallel to it.

413275, Alaska State. Type II Incident Management Team (Wilcock) committed. Four type II crews were evacuated from the line on 6/14. Burning conditions in the area are hot and dry. There are no natural barriers to contain the fire.

Outlook: A RED FLAG WATCH has been posted for southern Nevada and northwest Arizona for strong winds and very low relative humidities. A RED FLAG WARNING has been posted for southern Utah for strong winds and very low relative humidities. Sunny and not quite so windy in New Mexico with afternoon and evening thunderstorms. Colorado, Utah, Nevada and southern California will be sunny, dry and windy. Northern Utah will be partly cloudy with isolated mountain showers. Northern Nevada will be partly cloudy and breezy. The potential exists for increased fire activity and competition for Airtankers, Type I Crews and Type II Helicopters.

LARGE FIRES: (Listed in order by GACC)
