SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS
NATIONAL WEATHER SERVICE ANCHORAGE ALASKA
900AM ADT June 17,1994 FORECAST FOR TODAY

WEATHER SYNOPSIS AND MAP DISCUSSION...

SURFACE...A HIGH PRESSURE RIDGE WITH DRY WEATHER EXTENDS UP
ACROSS THE ALASKAN PENINSULA OVER SOUTHWESTERN ALASKA. THIS RIDGE
IS BUILDING EASTWARD OVER SOUTH CENTRAL ALASKA. A WEAK LOW PRESSURE
CENTER IS JUST SOUTH OF PRINCE WILLIAM SOUND WITH A COLD FRONT TO
THE SOUTH OVER THE GULF. A STATIONARY FRONT EXTENDS FROM THE
NORTHWEST COAST OF ALASKA INTO THE MID SECTIONS OF THE CANADIAN
YUKON. ANOTHER LOW PRESSURE TROUGH IS EXPECTED TO MOVE SOUTHEAST
OUT OF SIBERIA INTO NORTHWEST ALASKA ALONG THIS FRONT TONIGHT.
CLOUDS AND SOME RAIN OR SHOWERS WITH THIS FEATURE... SHOULD SPREAD
ACROSS KUSKOKWIM VALLEY TONIGHT AND SATURDAY THEN FURTHER EAST
OVER MATSU-COPPER RIVER AREAS LATER SATURDAY.

ALOFT...THE UPPER LEVEL TROUGH IS SOUTHWARD ALONG THE EASTERN
ALASKA-CANADIAN BORDER AND ACROSS SOUTHEAST SECTIONS OF COPPER
RIVER AREA INTO THE EASTERN GULF. CONVECTIVE SHOWERS AND
THUNDERSTORMS THIS AFTERNOON AND EVENING SHOULD BE MAINLY UNDER AND
EAST OF THIS TROUGH. THE UPPER LEVEL HIGH PRESS IS OVER THE BERING
SEA. A WEAKER RIDGE OF HIGH PRESSURE IS OVER THE EASTERN GULF AND
UPPER SOUTHEAST PANHANDLE.

...MCGRATH ZONE INTERIOR...

.CLDS/WX...PARTLY CLOUDY. HIGHS IN MID TO UPPER 60S. WEST WINDS
BACKING TO SOUTHWEST IN AFTERNOON AT 10 TO 15 MPH.

.TSTMS...NONE.

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY 06/17/94 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Large fire activity continued in Alaska, Rocky Mountain, Eastern Great Basin and the Southwest Areas. One Shower, five Airtankers, a booster crew of smokejumpers and numerous overhead were mobilized to the Southwest Area. A Caterer and numerous overhead were mobilized to the Rocky Mountain Area. Several overhead were mobilized to Alaska. Numerous units in the Southwest, Rocky Mountain, Great Basin, and California are reporting high to extreme fire indices.

Rocky Mountain Area Large Fires:

GUERNSEY, Wyoming State. No new information available.

ROCK CREEK, Routt NF. Type II Incident Management Team (Hart) committed. The fire is located on the Yampa Ranger District and is suspected to be human caused. No estimate of containment or control has been projected.

Southwest Area Large Fires:

PIGEON, Gila NF. Type I Incident Management Team (Shaw) committed. Major effort yesterday was to establish spike camps to support line personnel. Line constructed on the northwest side overnight will be used as an anchor point for major suppression effort today. Present plan includes heavy use of medium helicopters for crew transport and to support spike camps.

SPRUCE, Gila NF - Type II Incident Management Team (Butler) committed. Good progress was made using airtanker drops. Coyote tactics are being used on this wilderness fire.

RYAN COMPLEX, Cibola NF. Type I Incident Management Team (Denton) committed. The emphasis is to work on the south side of the Ryan fire. Steep terrain and talus slopes are making full containment difficult and slow. Crews on the Coffee Pot fire continued to construct contingency line around the fire. Expect another 4 days to finish due to heavy fuels and steep terrain in the Apache Kid Pea area.

ORGANS, Las Cruces District, BLM. The fire is burning mostly on military land. Current threats are to a visitor center and Aquirre springs.

BRIDGE, Lincoln NF. Type II Incident Management Team (Bedlion) committed. The fire is contained. Mop-up and rehabilitation will continue the next couple of days. Demobilization will begin today.

East Great Basin Large Fires:

WILLOW BASIN, Utah State and Manti-Lasal NF - Type I Incident Management Team (Birch) committed. Significant progress was made yesterday. A minor threat is to structures and the control line with predicted higher temperatures. Major concerns are possible spotting, holding control lines and minimizing impacts on the land.

DAVIS MOUNTAIN, Salt Lake District, BLM Utah. Fence lines and possibly a RAWs station have been burned. The fire is burning in flashy grass and sage fuels. Today's fire behavior expected to intensify due to a decrease in relative humidities and increased temperatures and winds. Remaining threats include rangeland habitats, cattle and fence lines.

California Large Fires:

LAKELAND, California State. The fire has been declared contained and heavy demobilization is underway.

Alaska Large Fires:

413212, Alaska State. Type II Incident Management Team (Dash) has been released. The fire has received some precipitation and cooler weather has moved into the area. Suppression operations continue with no problems reported. The fire has burned into a hazardous material area (old military dump).

401275, Alaska State. Type II Incident Management Team (Wilcock) committed. The fire continued to gain acreage yesterday. Suppression operations included line construction, hand firing, and suppression of spot fires. Aerial firing operations are planned when conditions permit. Burning conditions remain high due to windy conditions.

Outlook: A RED FLAG WATCH has been posted for northwest Arizona for strong gusty winds and low humidity. Arizona, New Mexico, Colorado, Utah and Nevada will be sunny, warm and dry with low humidities. New Mexico will have a chance of afternoon and evening thunderstorms. Southern California will be sunny and warm with less wind and low humidities in the interior deserts. Fire activity is expected to continue as no major relief in the weather is predicted. Alaska will be partly cloudy with a few showers and minimum humidities between 30-40% in the interior. Expect fire activity to moderate in Alaska.

LARGE FIRES: (Listed in order by GACC)
