**INCIDENT MANAGEMENT SITUATION REPORT**  
**SATURDAY 06/18/94 0900 MDT**  
**NATIONAL PREPAREDNESS LEVEL III**

**Current Situation:** Large fire activity continued in southern California, the Rocky Mountain, Eastern Great Basin and the Southwest Areas. Four Type I Crews, two Type II Helicopters, one Type I Helicopter and a Caterer and Shower were mobilized to the Garlic fire in southern California. Miscellaneous overhead continued to be mobilized to the Southwest Area. Fire activity has moderated in Alaska due to cooler, wet weather that moved into the northern half of the state. Very high and extreme indices are being reported on numerous units in California, the Rocky Mountain, Southwest and Great Basin Areas.

**Rocky Mountain Area Large Fires:**

ROCK CREEK, Routt NF. Type II Incident Management Team (Hart) committed. The fire is burning in mature lodgepole pine. The incident objectives are to protect a high voltage power line, commercial timber land and riparian habitat. Firefighters will be working on reinforcing the fireline and mopping up hotspots along the line.

**Southwest Area Large Fires:**

PIGEON, Gila NF. Type I Incident Management Team (Shaw) committed. Successful air operations was accomplished shuttling personnel to the fire line. Airtankers were used to inhibit major fire runs. Fire behavior was reduced due to higher relative humidity and lower wind velocity. Extremely steep slopes and rockiness will slow the remaining line construction.

SPRUCE, Gila NF. Type II Incident Management Team (Butler) committed. Cloud cover and higher relative humidity allowed crews to make good progress on the fire. An increase in acreage was due to more accurate mapping. Heavy fuels and steep terrain is making mop-up operations difficult.

RYAN COMPLEX, Cibola NF. Type I Incident Management Team (Denton) committed. Crews completed line around the escape area on the Ryan fire. Bucket drops and airtankers were used to cool hotspots and stop runs within the area, assisting in the completion of the line. Crews completed approximately 5 miles of line on the Coffee Pot fire yesterday. Fire behavior has decreased due to higher relative humidity and the fire burning in an area with less fuels. Burned logs and debris continue to reburn inside talus slopes within the fireline making mop-up extremely difficult.

ORGANS, Las Cruces District, BLM. Good progress was made on the fire yesterday. Cox visitor center and historic structures appear to be secure.
