**INCIDENT MANAGEMENT SITUATION REPORT
 MONDAY 06/20/94 0530 MDT
 NATIONAL PREPAREDNESS LEVEL III**

Current Situation: Progress in reaching containment targets continued in the Southwest Area due to cooler temperatures, higher relative humidity and scattered precipitation. Numerous units continue to report very high indices. Minor demobilization of overhead, airtankers, a caterer and a shower unit occurred through NICC yesterday.

The Eastern Great Basin and Rocky Mountain Areas released overhead, two caterers and a shower yesterday through NICC. Very high and extreme indices continue to be reported in Utah and Colorado.

Southwest Area Large Fires:

PIGEON, Gila NF. Type I Incident Management Team (Shaw) committed. Showers kept fire behavior low yesterday. Good progress was made using direct attack. Topographic complexities remain the primary control problem.

ORGANS, Las Cruces District, BLM. The lines held under strong winds from thunderstorms yesterday. The fire is burning actively on military land to the south. No structures are threatened at this time. Mop-up continues around areas of improvements.

Alaska Large Fires:

404275, Alaska State. Type II Incident Management Team (Wilcock) committed. Helitorch operations will continue as weather permits due to precipitation received.

Outlook: Central and eastern Arizona, central and western New Mexico, Colorado and Utah will be mostly cloudy with scattered afternoon thunderstorms. Western Arizona and eastern New Mexico will be mostly sunny, with isolated afternoon thunderstorms in eastern New Mexico. Southern and eastern Nevada and the extreme eastern deserts of southern California will be partly cloudy with a slight chance of afternoon thunderstorms. Initial attack activity may increase in the above Areas with the forecasted thunderstorms. Demobilization on large fires will increase as fires continue to meet containment targets. Alaska will be cool with continued rain; no significant activity is anticipated.
