INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY 06/21/94 0530 MDT
NATIONAL PREPAREDNESS LEVEL II

Current Situation: Containment targets continued to be met in the Southwest Area with cooler temperatures, higher relative humidity and scattered precipitation. Numerous units continue to report very high indices. Demobilization of resources increased yesterday through NICC. Favorable weather and availability of initial attack resources are keeping new starts at minimal acreages.

Very high and extreme indices were reported in the Great Basin, Rocky Mountain and California.

Cool and wet weather conditions persist in Alaska, diminishing new fire activity. Acreage increases continue to be reported on ongoing, mainly limited fires. There are 48 limited suppression fires burning for a total of 72,870 acres.

Southwest Area Large Fires:

PIGEON, Gila NF. Type I Incident Management Team (Shaw) committed. Burnout operations were suspended yesterday due to spotting despite moderate humidities. Hand crews and an airtanker caught a spot fire. Demobilization of some crews and overhead is scheduled for today.

ORGANS, Las Cruces District, BLM. The southern edge of the fire is the only portion that is uncontained. If this portion of the fire does not hold at natural barriers overnight, a successful burn-out operation should then bring containment. Four Type I Crews are scheduled for demobilization this morning.

Alaska Large Fires:

404275, Alaska State. Type II Incident Management Team (Wilcock) committed. Weather permitted building direct line on the north side of the fire. Mop-up and line construction continue.

Outlook: Arizona, New Mexico, Colorado and Utah will have scattered afternoon and evening thunderstorms. Highs will range from the 70's and 80's in the mountains and 90's to 110 in the deserts. Successful initial attack activity is expected to continue. Nevada will have widely scattered thunderstorms east and will be sunny west and central. Minimum humidities will be down to 5-10% with high temperatures in the 90's to 110. Southern California will have a few thunderstorms in the far eastern deserts, otherwise sunny except for low clouds and fog along the coast. Minimum humidities will be down to 8% with southwest winds 12-25 mph in the deserts. Highs will be in the 80's mountains to 110 in the deserts. No significant activity is anticipated in southern California and Nevada. Alaska will be partly cloudy north with rain in the south. Highs will be in the 50's. New fire activity is expected to be minimal.

LARGE FIRES:

 SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS
 NATIONAL WEATHER SERVICE ANCHORAGE ALASKA
 900AM ADT June 21, 1994 FORECAST FOR TODAY

...WEATHER SYNOPSIS AND MAP DISCUSSION...
 A LOW PRESSURE CENTER IS OVER BRISTOL BAY WITH A WARM FRONT EASTWARD OVER KODIAK ISLAND AND A COLD FRONT SOUTHWARD INTO PACIFIC. AN OCCLUDED FRONT EXTENDS TO NORTHWEST FROM THIS LOW INTO ANOTHER LOW PRESSURE CENTER OVER THE WESTERN BERING SEA. A STATIONARY FRONT EXTENDS FROM THE SEWARD PENINSULA TO A WEAK LOW OVER THE UPPER CANADIAN YUKON THEN ON EASTWARD. HIGH PRESSURE CENTERED SOUTH OF THE GULF OF ALASKA RIDGES NORTHWARD OVER THE SOUTHEAST PANHANDLE INTO THE SOUTHERN CANADIAN YUKON. THE LOW OVER BRISTOL BAY IS EXPECTED TO MOVE SLOWLY NORTHWARD AND WEAKEN. THE LOW OVER THE BERING SEA SHOULD PERSIST. THIS COMBINATION OF WEATHER FEATURES SHOULD MAINTAIN CLOUDINESS AND SOME RAIN ALONG WITH COOL TEMPERATURES AND HIGH HUMIDITIES OVER SOUTHERN ALASKA TODAY AND WEDNESDAY. CONVECTIVE THUNDERSTORMS ACTIVITY IS NOT EXPECTED.

...MCGRATH ZONE INTERIOR...
 .CLDS/WX...CLOUDY WITH RAIN LIKELY. HIGHS IN MID TO UPPER 50S. SOUTHEAST WINDS SHIFTING TO SOUTH AND INCREASING TO 10 TO 15 MPH IN AFTERNOON.
 .TSTMS...NONE.
