INCIDENT MANAGEMENT SITUATION REPORT

WEDNESDAY 06/22/94 0530 MDT

NATIONAL PREPAREDNESS LEVEL II

Current Situation: Cold and wet weather persists in Alaska with demobilization taking place on most fires. All staffed fires are now contained except 404275.

An increase in fire activity was reported in the Great Basin and Northern Rockies due to lightning. Nevada has several units reporting extreme indices, while Utah only has one unit still reporting very high.

Increased initial attack with one escaped fire in South Zone California necessitated the movement of three airtankers from the Southwest Area. One radio system, one shower unit and one type II helicopter were mobilized through NICC.

Demobilization of contained large fires is continuing in the Southwest Area. Favorable weather and available initial attack resources have kept new starts at minimal acreages.

South Zone Large Fires:

WHITE BLANKET, Kern County, Sequoia NF and Bakersfield District, BLM. The fires is 2,500 acres and has potential to reach 10,000 acres if it burns into the Dome Land Wilderness.

Southwest Area Large Fires:

PIGEON, Gila NF. Type I Incident Management Team (Shaw) committed. The fire perimeter has at least a scratch line around it, 45% of the perimeter needs to be improved and secured with a black line. Spotting continues to be a problem despite precipitation and higher humidities. Containment has been set back to 6/26 from 6/22.

ORGAN, Las Cruces District, BLM. Two airtankers, one helicopter and ground forces were used on the south flank to contain hotspots. Acreage increase was due to southward movement and remapping the fire perimeter using GPS.

Outlook: Arizona, New Mexico, Colorado and Utah will have scattered afternoon and evening thunderstorms with high temperatures in the 70's and 80's in the mountains and 90's to 110 in the deserts. Eastern Nevada will have a few thunderstorms, west and central Nevada will be sunny with highs in the 90's to 110. Southern California will have a few thunderstorms over the eastern deserts, otherwise sunny with minimum humidities down to 8 percent. Potential for increasing fire activity exists in the above areas. Alaska will continue to be partly cloudy with showers, highs will be in the 50's.
