 900AM ADT June 24, 1994 FORECAST FOR TODAY

...WEATHER SYNOPSIS AND MAP DISCUSSION...

A LOW PRESSURE SYSTEM IS OVER THE BERING SEA AND SOUTHWEST ALASKA. THERE ARE TWO CENTERS...ONE IS JUST NORTH OF DILLINGHAM OVER THE BRISTOL BAY COASTAL AREA. THE OTHER CENTER IS JUST SOUTH WEST OF JUNIVAK ISLAND. THE SYSTEM IS EXPECTED TO MERGE INTO A SINGLE CENTER AND MOVE NORTHWARD TO THE UPPER KUSKOKWIM VALLEY BY LATE TODAY...THEN TRACK TO EAST ALONG A TROUGH OF LOW PRESSURE AND FRONTAL BOUNDARY THAT EXTENDS FROM THE SEWARD PENINSULA EASTWARD INTO THE CANADIAN YUKON. A COLD FRONT EXTENDS SOUTHWARD FROM THE LOW NEAR DILLINGHAM ALONG EAST SIDE OF KODIAK ISLAND AND ON TO THE SOUTH. THIS FRONT SHOULD MOVE EASTWARD AND EXTEND SOUTHWARD FROM THE PARENT LOW OVER EAST CENTRAL ALASKA TO ACROSS THE YAKUTAT AREA BY EARLY SATURDAY. RAIN ALONG AND AHEAD OF THE LOW PRESSURE AND FRONTAL SYSTEM WILL AFFECT MOST OF SOUTHERN ALASKA TODAY. THE ASSOCIATED UPPER LEVEL LOW PRESSURE SYSTEM SHOULD TRACK EASTWARD FROM THE SOUTHEAST BERING SEA TO NEAR COOK INLET BY SATURDAY. THIS WILL KEEP CLOUDINESS AND SHOWERS ACROSS SOUTHERN ALASKA BEHIND THE SURFACE SYSTEMS.

COLD AIR ALOFT WITH THE UPPER LOW WILL CAUSE UNSTABLE CONDITIONS WITH A SLIGHT CHANCE OF AN ISOLATED WET THUNDERSTORM ALONG THE BRISTOL BAY COAST AND UPPER ALASKAN PENINSULA TODAY.

...MCGRATH ZONE INTERIOR...

.CLDS/WX...CLOUDY WITH RAIN. RAIN MAY BE HEAVY AT TIMES NEAR THE ALASKAN RANGE. HIGHS IN MID TO UPPER 50S. SOUTHWEST WINDS AROUND 10 MPH.

.TSTMS...NONE.

INCIDENT MANAGEMENT SITUATION REPORT  
 FRIDAY 06/24/94 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL II

**Current Situation:** The Northwest Area reported an increase in new fire starts with none escaping initial attack. Airtanker support was utilized for new starts in the Northwest Area and northern California.

Initial attack activity was reported in the Northern Rockies, northern California and the Great Basin with lightning occurrence and dry, hot, and windy conditions.

Demobilization of overhead continued from the Southwest Area. Southern California expects to begin demobilization of resources today.

**California - South Zone Large Fires:**

**WHITE, Sequoia NF.** Type I Incident Management Team (Harbour) committed. Ten chains of fire line remain to be built. Massive demobilization is scheduled for today. Containment expected today, 6/24.

**Southwest Area Large Fires:**

**PIGEON, Gila NF.** Type I Incident Management Team (Shaw) committed. The fire is now 90% contained. Heat and wind put lines to the test, all of which held. Contingent on lines holding, major demobilization will begin today.

**ORGAN, Las Cruces District, BLM.** A burnout operation stopped the spread of the fire at Rucker and Soledad Canyons. Acreage increase was due to burnout operation and remapping using GPS.

**Outlook:** A RED FLAG WARNING has been issued for the western Utah valleys for dry and breezy conditions. Gusty southwest winds are also forecast for Nevada. The remainder of the western states expect warm and sunny weather with extremely high temperatures and low humidities in the deserts of southern California, southern Nevada and Arizona. Initial attack activity is expected in the majority of the western states with the potential to increase in Utah and Nevada with the presence of gusty winds.
