**INCL MT MANAGEMENT SITUATION REPORT**  
**TUESDAY 06/28/94 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL III**

**Current Situation:** Fire activity increased in most of the western Geographic Areas again yesterday. Very high and extreme fire indices are being reported on many more units. A drawdown on initial attack resources is occurring in several areas. Several national resources are in high demand and shortages are occurring.

Fire activity continued to increase in California. South Zone has ordered 5 type II helicopters, 2 type I helicopters, 1 caterer and 2 shower units.

The Rocky Mountain Area again experienced an increase in activity. One crew, 2 caterers and 2 engines have been ordered.

Increased fire activity in the Eastern Great Basin necessitated the ordering of 3 crews, 2 caterers and 2 shower units.

The Northwest experienced increased activity in southern Oregon. Three airtankers, 2 type I helicopters, 1 type I helicopter, 1 caterer and 1 shower unit have been ordered.

**Northwest Large Fires:**

CHILOQUIN COMPLEX, Winema NF and Oregon State. Type II Incident Management Team (Bright) committed. This complex consists of three large fires and a two smaller ones. The fires are located near Chiloquin, Oregon and are threatening homes in the area.

**Eastern Great Basin Large Fires:**

BOY SCOUT, Wasatch-Cache NF. A Type II Incident Management Team (Martin) has been committed. The fire is located approximately 20 miles southwest of Evanston, Wyoming and is burning in Douglas Fir and Lodgepole Pine stands.

COALBED, Moab District, BLM. A Type II Incident Management Team (Fitzgerald) has been committed. The fire is located approximately 40 miles southeast of Monticello, Utah. Fire increased from 8 acres to 700 acres in 5 hours.

**California**

**South Zone Large Fires:**

GIBBEL, Riverside R.U., California State. This new fire briefly threatened the Ramona Bowl near Hemet.

LUCAS COMPLEX, Sequoia NF. This fire is on the north slope of Breckenridge Mountain; a result of 5 lightning fires burning together. A Forest Service lookout and 30-40 recreation residences were threatened yesterday.

FAIRVIEW, Riverside R.U., California State. This new fire near Hemet on the west side of Bautista Canyon threatened numerous structures before it spread southward.

BAILEY, Riverside R.U., California State. The fire has doubled in size.

PEAK, Sequoia NF. This fire is located north of the Kern River and has not received much attention because it's a lower priority than the Lucas Complex south of the river.

SECOND, Cleveland NF and San Diego County. Type I Incident Management Team (Dougherty) is committed. High temperatures, low humidities and rugged terrain are hampering firefighters efforts.

**Southwest Area Large Fires:**

RYAN COMPLEX, Cibola NF. A Type II Incident Management Team (Blackwell) is committed. Burn-out operations were planned for last night, afternoon winds, high temperatures and low humidities are preventing day firing operations. Gusty winds are causing severe burning conditions.

**Rocky Mountain Area Large Fires:**

BUNIGER, Grand Junction District, BLM. A Type II Incident Management Team (Hart) is committed. The fire is burning northwest of Grand Junction, CO in dense stands of pinon juniper, oak and Douglas Fir. The fire is experiencing erratic fire behavior.

**Outlook:** A RED FLAG WATCH has been posted for southeast Utah for hot, dry, breezy conditions and the threat of dry thunderstorms. Continued hot, dry, windy conditions and low relative humidities are expected in the southwestern U.S. Expect warm and mostly dry conditions in the Northwestern U.S. Isolated afternoon thunderstorms with very little moisture are expected over the higher terrain of Utah, north central Colorado, New Mexico, southeastern Arizona, southern Idaho and southern California.

SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS  
 NATIONAL WEATHER SERVICE ANCHORAGE ALASKA  
 900AM ADT June 28, 1994 FORECAST FOR TODAY

...WEATHER SYNOPSIS AND MAP DISCUSSION...

LOW PRESSURE IS OVER THE GULF OF ALASKA SOUTH OF PRINCE WILLIAM SOUND. AN OCCLUDED FRONT IS AROUND THE NORTH AND EAST SIDE OF THIS LOW JUST OFF THE SOUTHEAST COAST. THERE WILL BE CLOUDINESS AND SOME AREAS OF LIGHT RAIN AROUND THIS LOW OVER THE SOUTHEAST AND SOUTHCENTRAL COASTAL AREAS. CLOUDINESS AND A FEW SPRINKLES OR SHOWERS EXTEND INLAND OVER THE COPPER RIVER...MATSU AND KENAI PENINSULA TO THE NORTH AND WEST OF THE LOW. THE SYSTEM WILL MOVE SLOWLY TO NORTHEAST TODAY AND WEDNESDAY. AN ELONGATED HIGH PRESSURE IS ACROSS THE BERING SEA WITH EASTERN PORTIONS OF THE HIGH OVER THE SOUTHWEST COAST AND BRISTOL BAY AREA. DRYER WEATHER WITH THIS SYSTEM SHOULD SPREAD EASTWARD OVER SOUTH CENTRAL ALASKA TONIGHT AND WEDNESDAY. ANOTHER LOW PRESSURE AND FRONTAL SYSTEM IS SOUTH OF THE CENTRAL ALEUTIANS AND A THIRD LOW PRESSURE IS SOUTHWEST OF THE WESTERN MOST ALEUTIANS. RAIN WITH THE FIRST SYSTEM SHOULD REMAIN WELL SOUTH AS IT MOVES TO EAST. THE WESTERN SYSTEM WILL BRING RAIN UP OVER THE SOUTHERN BERING SEA AND ALEUTIANS TONIGHT AND WEDNESDAY AND PERHAPS ON UP TO SOUTHWESTERN COASTAL AREAS LATER IN THE WEEK. A WEAK LOW PRESSURE IS OVER THE INTERIOR EAST OF THE SEWARD PENINSULA WITH A TROUGH TO SOUTH OVER THE EASTERN KUSKOKWIM VALLEY TO BRISTOL BAY.

CONVECTIVE THUNDERSTORMS THIS AFTERNOON AND EVENING SHOULD BE MAINLY OVER EASTERN INTERIOR AREAS OF ALASKA INCLUDING NORTHERN PORTIONS OF THE COPPER RIVER AREAS AND NORTHERN MOST MOUNTAINS OF THE MATSU AREA. SOME CONVECTIVE SHOWER SHOULD DEVELOP FURTHER WEST OVER THE NORTHERN KUSKOKWIM AREA.

...MCGRATH ZONE INTERIOR...

.CLDS/WX...PARTLY CLOUDY. ISOLATED AFTERNOON SHOWERS. HIGHS IN MID 50S TO LOWER 60S. WINDS MOSTLY SOUTHWEST AT 10 MPH OR LESS.  
 .TSTMS...NONE.
