 FIRE WAS TOTALLY DEMOBED TODAY. A CASA TRANSPORTED 8 OVERHEAD TO
 FAIRBANKS. A DEBRIEFING WITH IC HOUDE AND TOK STAFF WAS HELD IN
 NORTHWAY, FINAL ANALYSIS WAS A VERY WELL MANAGED FIRE. HELICOPTER
 25FJ RELOCATED TO TOK FOR IA. THE USFS RESEARCH GROUP WORKING ON
 THE LICK CREEK FIRE 413330, WITHIN THE USF&W REFUGE, PLANNED TO
 CHECK FIRE EFFECTS ON THE 10 MILE HILL FIRE. THIS GROUP HAS
 FAMILIARITY WITH THE CANADIAN RESEARCH AND THEIR PEOPLE, MAYBE A
 COMBINED AMERICAN/CANADIAN EFFORT COULD BE PURSUED FURTHER FROM
 ALASKA FOR ALASKA FUEL TYPES???? FIRE CALLED OUT.

INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY 06/30/94 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack and new large fires continued in California, Rocky Mountain, Great Basin and Southwest areas. Fire indices are very high and extreme in most areas of the Southwest, Great Basin, Rocky Mountain and California.

Initial attack resources are stretched thin in most areas. Competition continues for Type I crews, airtankers, and medium helicopters. Containment was achieved on several fires, however; resources are being reassigned as fast as they are released.

NICC continues to mobilize resources to the Southwest, Great Basin, Rocky Mountain, and California.

Northwest Large Fires:

CHILOQUIN COMPLEX, Winema NF and Oregon State. 1,500 acres. Type II Incident Management Team (Bright) committed. Fires are contained and heavy demob will begin today.

Western Great Basin Large Fires:

RATTLESNAKE, Las Vegas District, BLM, 5,700 acres. The fire is burning in the Gold Butte Wilderness Study Area in the Caliente Resource Area. Major threats are the WSA and Desert Tortoise habitat. Slow arduous line construction has delayed the projected containment date until 6/30. High temperatures are significantly impacting personnel performance. Air tanker drops were effective in holding the line this afternoon.

Eastern Great Basin Large Fires:

BOY SCOUT, Wasatch-Cache NF, 425 acres. A Type II Incident Management Team (Martin) is committed. Suppression strategies are working as planned and line construction is on schedule. A new human caused fire was discovered a half mile from ICP with considerable potential, but was suppressed quickly. Numerous spots outside of the line continue to show up.

COALBED, Moab District, BLM, 970 acres. A Type II Incident Management Team (Fitzgerald) is committed. Incident personnel discovered and suppressed two nearby ignitions and provided initial attack on the nearby Mustang incident. Some flare-ups within the lines from gusty winds, high temperatures and low relative humidities occurred.

BITTER CREEK, Moab District, BLM, 3,500 acres. A Type II Incident Management Team (Williams) will take over the fire this morning. A natural gas well and drip gas storage tank are on fire. Current threats are to gas wells, pipelines and storage tanks.

MARBLE CANYON, Utah State, 450 acres. The fire is located approximately 20 miles east of Ogden and is threatening structures.

MUSTANG, Moab District, BLM, 440 acres. The fire caused the evacuation of a campground and threatened residents, archeological sites and powerlines.

California

South Zone Large Fires:

LUCAS COMPLEX, Sequoia NF, 6,960 acres, A Type I Incident Management Team (Harbour) is committed. This complex includes the Lucas and Peak fires. High temperatures are significantly impacting personnel performance. Containment has been moved back a day due to a 200 acre slopover.

SECOND, Cleveland NF and San Diego County, 4,700 acres, a Type I Incident Management Team (Dougherty) is committed. Losses include the habitat of two threatened and endangered birds, the Gnat Catcher and Least Bell's Vireo.

BAILEY, Riverside Ranger Unit, California State, 6,420 acres. Tuesday afternoon while firing a control line, the wind shifted resulting in a 760 acre slopover. One dozer deployed it's curtain, 1 Captain and 5 inmates on the Cuesta crew deployed their shelters. No one was injured. Adverse weather conditions yesterday slowed line construction, resulting in containment being pushed back a day.

COPPER COMPLEX, Calaveras County, California State, 3,250 acres. The complex consists of 5 fires. Two mobile homes have been destroyed and the fire is heading toward the town of Cooperopolis. Evacuations and road closures took place yesterday afternoon.

PIUTE COMPLEX, California Desert District, BLM, 3,500 acres. Three large fires and 14 smaller ones are included in this complex. Only 3 of the fires have resources assigned. Extreme fire behavior and temperatures of 120+ are creating suppression problems. All line was lost yesterday afternoon. A Type II Incident Management Team will be assigned to the fire this morning.

Southwest Area Large Fires:

RATON, Cibola NF, 50-75 acres. A Type II Incident Management Team (Bedlion) is committed. This fire is burning in heavy slash and is threatening private land, a game refuge and lodge.

ORACLE, Arizona State, 1,200 acres. Fire spread was rapid due to the weather conditions. Power transmission lines serving San Manual mine were threatened early yesterday morning.

CATCLAW COMPLEX, Prescott NF, 800 acres. A Type II Incident Management Team (Butler) is committed. This complex is comprised of two fires, the Catclaw at 300 acres and the Peck at 500 acres. The Peck fire made some late afternoon runs yesterday. No crews will be out on the line tonight due to safety reasons. Structures and private land are threatened.

RYAN COMPLEX, Cibola NF, 24,800 acres. A Type II Incident Management Team (Blackwell) is committed. Burnout of 320 acres of potential trouble spots were burned yesterday. Lines were reinforced and mop-up continued. Ground and aerial ignition is being used to burn out unburned islands.

TANGLE, Tonto NF, 2,000 acre. The fire is threatening private property and a riparian area.

PERKINS COMPLEX, Phoenix District, BLM, 25,946 acres. A Type II Incident Management Team (Whitney) is committed. The fire is contained. Large acreage increase is due to firing operation from indirect attack.

JURASSIC, Phoenix District, BLM and Arizona State, 3,385 acres. The fire is contained and evacuees are returning to their homes.

Rocky Mountain Area Large Fires:

BUNIGER, Grand Junction District, BLM, 1,600 acre. A Type II Incident Management Team (Hart) is committed. This fire is burning in scrub oak and pinon-juniper approximately 24 miles northwest of Grand Junction, CO. Multiple retardant drops aided suppression efforts. Bruce Babbitt, U.S. Secretary of the Interior, was included as a member of a hotshot crew yesterday. The Secretary, wanting actual firefighting experience, went out at 0800 and returned with the crew at 1915 for dinner.

Outlook: A strong high pressure system centered over southern Arizona and New Mexico has brought near record heat to the desert southwest and southern California. Temperatures in the deserts are expected to reach 125 degrees. The remainder of the west is influenced by a Pacific frontal system which will bring cooler temperatures to the interior. Initial attack and large fires are expected to continue as adverse weather conditions prevail.

NORTHERN ALASKA FIRE WEATHER FORECAST FOR THURSDAY, JUNE 30 1994
 NATIONAL WEATHER SERVICE FAIRBANKS ALASKA
 ISSUED 9:30 AM ADT THURSDAY

OTHER SYNOPSIS AND MAP DISCUSSION.
 ATMOSPHERE REMAINS SOMEWHAT UNSTABLE EAST OF FAIRBANKS AND
 CIRCLE, SO ISOLATED CONVECTION IS POSSIBLE TODAY. THE MAJORITY OF
 THE INTERIOR IS DOMINATED BY SURFACE HIGH PRESSURE, THEREFORE
 WARM AND DRY CONDITIONS CAN BE EXPECTED INTO SATURDAY. A
 DISTURBANCE NORTH OF KOTZEBUE CONTINUES TO BRING MOISTURE INTO
 THE KOTZEBUE SOUND AND CLOUDINESS INTO THE KOBUK. BY LATE
 FRIDAY, SURFACE LOW PRESSURE MOVING NORTHEAST THROUGH THE BERING
 SEA WILL INTRODUCE SOME MOISTURE INTO THE SOUTHWESTERN GALENA
 ZONE.

JPPER YUKON ZONE AND NORTHERN REGION
 CLDS/WX..MOSTLY SUNNY. ISOLATED AFTERNOON THUNDERSTORMS EAST OF
 DELTA AND CIRCLE.
 MAX. TEMP..67-77
 MIN. RH..25-35%
 WIND..WEST TO SOUTHWEST 6-12 MPH
 TSTMS..ISOLATED AVE WET SOUTHEAST OF CIRCLE AND EAST OF DELTA
 #D 940630

SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS
 NATIONAL WEATHER SERVICE ANCHORAGE ALASKA
 900AM ADT June 30, 1994 FORECAST FOR TODAY

...WEATHER SYNOPSIS AND MAP DISCUSSION...

A RIDGE OF HIGH PRESSURE FROM THE SEWARD PENINSULA SOUTH THROUGH BRISTOL BAY AND THE EASTERN ALASKA PENINSULA WILL MOVE EAST EXTENDING FROM A HIGH OVER THE UPPER YUKON VALLEY THROUGH PRINCE WILLIAM SOUND BY FRIDAY MORNING THEN DISSIPATE. A LARGE LOW IN THE SOUTH CENTRAL BERING SEA WILL MOVE TO NEAR ST MATTHEW ISLAND BY FRIDAY MORNING. THE ASSOCIATED FRONT FROM THE LOW THROUGH DUTCH HARBOR WILL MOVE ONSHORE OF THE BERING SEA COAST FRIDAY MORNING. THIS WILL BRING RAIN AND COOLER WINDY CONDITIONS TO THE BETHEL AND BRISTOL BAY ZONES FRIDAY MORNING. THE FRONT WILL THEN CONTINUE EAST THROUGH THE INTERIOR SPREADING RAIN AND HIGHER RELATIVE HUMIDITIES INTO THE WESTERN INTERIOR TO THE GULF OF ALASKA BY FRIDAY NIGHT.

...MCGRATH ZONE INTERIOR...

.CLDS/WX...SUNNY. HIGHS IN THE MID 60S TO LOW 70S. LIGHT SOUTH WINDS.

.TSTMS...NONE.
