INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY 7/1/94 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity continued throughout most of the western U.S. The Southwest, Rocky Mountain and Great Basin continue to report shortages of initial attack resources. Fire restrictions of some sort are in effect in most of the western states. Fire indices are very high and extreme on most units in the Southwest, Great Basin, Rocky Mountain and California.

Containment of several large fires in California has made some critical resources available to the Southwest. Good progress was made on large fires in the Great Basin and Rocky Mountain Areas as some achieved containment. Large fire activity continues to plague the Southwest Area. Although several fires have reached containment in the Southwest Area, new ignitions are escaping initial attack faster than resources are able to respond. Most of the mobilization through NICC is to support the Southwest. Eight MAFFS units will move from South Zone California to the Southwest Area this morning.

Eastern Great Basin Large Fires:

BITTER CREEK, Moab District, BLM, 3,500 acres. A Type II Incident Management Team (Williams) is committed. Spotty burning continues within the fire perimeter, however the perimeter did not increase yesterday.

COALBED, Moab District, BLM, 600 acres. A Type II Incident Management Team (Fitzgerald) is committed. Good progress was made in reinforcing the line. Acreage decreased due to refining the mapping. Demobilization is expected to begin today.

CHOKE CHERRY FLAT, Salt Lake District, BLM, 1,400 acres. The fire escaped the containment lines on the south, southwest and north lines.

California

South Zone Large Fires:

PIUTE COMPLEX, California Desert District, BLM, 3,500 acres. A Type II Incident Management team (McClain) is committed. This complex is comprised of 17 fires.

SOUTHWEST AREA Large Fires:

RATTLESNAKE, Coronado NF, 600 acres. A Type I Incident Management Team (Denton) has just assumed command of the fire. A Boy Scout Camp and other structures are threatened. No other information is available.

PIMA, Coronado NF, 200 acres. The fire is burning in the Pusch Wilderness next to the Tucson urban area.

CATCLAW COMPLEX, Prescott NF, 800 acres. A Type II Incident Management Team (Butler) is committed. The CATCLAW fire is contained, while the PECK is only 10% contained. The complex has assumed two new fires, the FORT, 100 acres and the CASTLE at 3,000 acres. Thirty residences are threatened.

ARMOR, Tonto NF, 3,000 acres. A Type II Incident Management Team (Whitney) is enroute. Private property and campgrounds are currently threatened.

BIG ROCKS, Lincoln NF, 200 acres. A Type II Incident Management Team (Bedlion) is committed. The Patos fire, 150 acres has also been assumed by this team.

Rocky Mountain Area Large Fires:

BUNIGER, Grand Junction District, BLM, 1,600 acre. A Type II Incident Management Team (Hart) is committed. The fire is in mop-up and operations will begin to shift to the Long Canyon fire, another fire being suppressed by this team.

LONG CANTON, Grand Junction District, BLM, 620 acres. This fire is also being suppressed by the Buniger team. The fire is burning in mixed pinon and juniper northwest of Grand Junction. Airtankers made 11 runs to the fire keeping spread to a minimum.

SQUAW MTN., Casper District, BLM, 200 acres. The fire is burning in bug killed timber with 5 homes within a mile of the fire.

BATTLEMENT MESA, Colorado State, 175 acres. The fire is burning adjacent to a mountain community of homes. Residences are threatened and evacuations occurred. Homeowners were later allowed to return. Aggressive air attack has kept the fire from burning any homes. One outbuilding was destroyed.

Outlook: A strong high pressure system remains in place over southern Arizona and New Mexico and near record temperatures will continue to occur. Scattered afternoon lightning is forecast. The influence of a storm moving into Canada and the northwest will bring slightly cooler temperatures and increased winds in that area and to California, Nevada and Utah. Fire activity is expected to increase with continued hot and dry conditions coupled with the risk of increased human caused fires during the 4th of July holiday weekend.

SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS
NATIONAL WEATHER SERVICE ANCHORAGE ALASKA
900AM ADT July 1, 1994 FORECAST FOR TODAY

...WEATHER SYNOPSIS AND MAP DISCUSSION...
HIGH PRESSURE CENTERED OVER THE ARCTIC OCEAN EXTENDS SOUTHWARD OVER THE CANADIAN YUKON AND EASTERN ALASKA. ANOTHER HIGH IS CENTERED SOUTH OF THE GULF OF ALASKA. THE UPPER LEVEL RIDGE OF HIGH PRESSURE ASSOCIATED WITH THESE SYSTEMS LAGS A BIT TO THE WEST AND EXTENDS FROM CENTRAL ALASKA SOUTHWARD OVER THE GULF. DRY WARM WEATHER UNDER THESE SYSTEMS WILL MOVE EASTWARD INTO CANADA BY SATURDAY. TO THE WEST...A LOW PRESSURE SYSTEM IS OVER THE BERING SEA NEAR THE PRIBILOF ISLANDS. AN OCCLUDED FRONT EXTENDS FROM THE LOW TO THE UPPER ALASKAN PENINSULA THEN ON TO THE SOUTHEAST OVER THE WESTERN GULF AS A WARM FRONT. A COLD FRONT DROPS SOUTHWARD OVER THE PACIFIC FROM THE UPPER ALASKAN PENINSULA. THE LOW SHOULD MOVE NORTHWARD TO THE SAINT LAWRENCE ISLAND AREA BY TONIGHT THEN BECOME NEARLY STATIONARY...BUT ELONGATE AND DEVELOP EASTWARD INTO MAINLAND ALASKA DURING SATURDAY. ANOTHER SMALL NEW LOW PRESSURE IS OVER THE PRINCE WILLIAM SOUND AREA AND A THIRD...MORE SIGNIFICANT LOW IS OVER THE LOWER SOUTHEAST PANHANDLE. THIS THIRD LOW SHOULD MOVE EAST INTO BRITISH COLUMBIA BY TONIGHT. MEANWHILE...BACK TO THE WEST...
CLOUDINESS AND RAIN ALONG AND AHEAD OF THE BERING SEA LOW SHOULD SPREAD NORTH AND EAST OVER THE KODIAK ISLAND...ALASKAN PENINSULA AND SOUTHWEST COASTS TODAY AND SLOWLY ON TO THE KUSKOKWIM VALLEY... KENAI PENINSULA...MATSU...PRINCE WILLIAM SOUND AREAS TONIGHT THEN ON TO THE COPPER RIVER AREA SATURDAY.

THE BEST CHANCE FOR AFTERNOON AND EVENING CONVECTIVE SHOWERS OR THUNDERSTORMS REMAINS IN AN UNSTABLE AREA OVER AND EAST OF THE COPPER RIVER AREA.

...MCGRATH ZONE INTERIOR...
.CLDS/WX...MOSTLY SUNNY. HIGHS IN LOW TO MID 70S. EASTERLY WINDS AROUND 10 MPH INCREASING TO 20 MPH IN GUSTS IN MOUNTAIN PASSES DURING AFTERNOON.
.TSTMS...NONE.
