INCIDENT MANAGEMENT SITUATION REPORT  
MONDAY, JULY 4, 1994 0900 MDT  
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity decreased in the Southwest and South Zone. Rocky Mountain experienced an increase in new ignitions. Resources continue to be reassigned between, and mobilized for the western States. Very high to extreme fire indices exist on numerous units in the Southwest, Great Basin, Rocky Mountain and California.

Adverse weather conditions caused control problems on several fires. New large fire activity occurred in the Southwest, California, and the Northwest Areas. NICC continues to mobilize crews, caterers, shower units, airtankers, smokejumper aircraft, helicopters, communications equipment and overhead.

Northern Rockies Large Fires:

ROBERTSON, Lolo NF. A Type II Incident Management Team (Suenram) is committed. The fire perimeter is being held by indirect line and support from helicopter water drops. A burnout of the unburned islands is planned for today. Initial demobilization is planned for 7/6.

Rocky Mountain Area Large Fires:

HOOR GLASS, Roosevelt NF. A Type I Incident Management Team (Richer) is committed. Colorado Governor Roy Romer reviewed the camp and line operations. The incident has been declared a state emergency fire. Structures continue to be threatened.

SHEEP MOUNTAIN, Bighorn NF. A Type II Incident Management Team (Adams) is committed. The fire has burned 80% around Sheep Mountain Lookout. Current threat is to old growth and high value timber.

SQUAW MOUNTAIN, Casper District, BLM. A Type II Incident Management Team (Green) is committed. Substantial precipitation from thunderstorms was experienced on the fire. Threats to structures are now minimal.

Outlook: A RED FLAG WARNING has been posted for the mountainins of Colorado for dry conditions, lightning and gusty winds. A RED FLAG WATCH has been posted for northern and central Arizona for strong winds and low humidity. Hot and dry conditions continue over the southwestern U.S. Isolated thunderstorms are forecast from the southwest deserts, north across Utah and Colorado. Initial attack with the possibility of escaped

fire activity is expected to continue in South Zone, the Southwest and Rocky Mountain Areas. Cooler temperatures across the northwestern U.S. will moderate initial attack activity.
