**INCIDENT MANAGEMENT SITUATION REPORT**  
**THURSDAY, JULY 14, 1994 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL III**

Current Situation: The Rocky Mountain Area continues to experience increasing initial attack activity. Extreme fire activity continues to plague fires in the Southwest Area. A caterer, 2 shower units, 3 radio systems, 49 crews, 3 type I helicopters, 2 type II helicopters, 1 type III helicopter and 24 smokejumpers were ordered by the Rocky Mountain Area through NICC.

Flags will be flown at half-mast today in memory of the two helitack crew members from the Gila NF that were killed 7/12 in a helicopter accident.

A Southern Area Type II Incident Management Team (Kearney) has been mobilized to Thomasville, GA to set up a shipping and receiving distribution center for FEMA.

**Rocky Mountain Area Large Fires:**

NORTH FORK, Grand Mesa/Uncompahgre/Gunnison NF. A Type II Incident Management Team (Spradlin) is committed.

2-ROAD, Grand Junction District, BLM. A Type II Incident Management Team (Stone) is committed. The fire is burning west of Mack, CO, near I-70 on the Colorado/Utah border. The Interstate has one lane open in each direction. Multiple structures are threatened.

BOX D, Craig District, BLM. The fire is 14 miles west of Meeker, CO. Airtankers supported suppression efforts on the fire yesterday. The east and south flanks were contained.

UTE CREEK, White River NF. A Type I Incident Management Team (Richer) will take over the fire today. Crews were pulled off the line yesterday when it blew up.

WRAY, Montrose District, BLM. The fire is west of Bedrock, CO. A Type II Incident Management Team (Hart) has been assigned.

BLUE GRAVEL, Craig District, BLM. The fire is about 15 miles north of Craig and is threatening structures and scattered ranches. Two out-buildings have been destroyed and critical wildlife habitat was damaged.

LARIMER COMPLEX, Arapaho/Roosevelt NF. A Type II Incident Management Team (Krugman) is committed. The complex is comprised of 9 fires. Favorable weather yesterday allowed crews to make excellent progress. Most of the fires were held.

INCIDENT NAME	UNIT	ST	SIZE	%	EST CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRUC LOST	ESTS LOSS	EST COST

**Southwest Area Large Fires:**

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. The fire has remained extremely active and continues to move south into the Chiricahua Wilderness. High priority areas have been identified for structure protection, which is where resource deployment will be concentrated.

Airtankers were used on the east flank to support crews during line construction and burnout operations to protect the Southwest Research Station.

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) is committed. Hot, dry weather and strong winds created severe fire behavior, resulting in two major runs to the east and north. This burned an additional 2,700 acres yesterday. Winds continue to push the fire to the east through grass and brush in the lower terrain and through brush and timber in the higher elevations. One ranch a mile west of the fire was provided structural protection.

BIG ROCKS COMPLEX, Lincoln NF. A Type II Incident Management Team (Butler) is committed. Bucket work continued on the remaining hot spots on the fire. Final demobilization of overhead and crews is planned for today.

PIGEON, Gila NF. Effective use of handcrews precluded significant acreage increase. The fire is burning into natural barriers.

California - North Zone Large Fires:

BROWNS, Shasta Trinity RU, California State. No information was received.

Outlook: Scattered afternoon and evening thunderstorms will occur over Wyoming, Colorado and New Mexico with isolated thunderstorms over eastern Utah, northeast Nevada and southwest Montana. The remainder of the West will be sunny with highs in the 80's and 90's, and 90's to 110 in the southwest states. Expect continued initial attack activity in most of the western states. Large fires will continue to resist control.

SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS  
 NATIONAL WEATHER SERVICE ANCHORAGE ALASKA  
 900AM ADT July 14, 1994 FORECAST FOR TODAY

...WEATHER SYNOPSIS AND MAP DISCUSSION...

WEAK LOW PRESSURE IN THE UPPER YUKON VALLEY WILL PERSIST THROUGH FRIDAY. A TROUGH FROM THE LOW TO THE BRISTOL BAY COAST WILL DRIFT NORTH AND DISSIPATE THURSDAY NIGHT. THE LOW AND ASSOCIATED TROUGH WILL KEEP CONDITIONS UNSTABLE FROM THE UPPER YUKON VALLEY THROUGH THE INTERIOR TO THE BRISTOL BAY COAST TODAY. AN UPPER LEVEL TROUGH OF LOW PRESSURE FROM THE BRISTOL BAY COAST SOUTH TO THE UPPER LEVEL LOW IN THE WESTERN GULF OF ALASKA WILL PERSIST AND SLOWLY ROTATE SOUTHEAST. THIS WILL CONTINUE TO SUPPLY SOUTHWEST ALASKA WIL UPPER LEVEL CLOUDS AND MOISTURE, THEREFORE, THUNDERSTORM ACTIVITY FROM THE SUSITNA VALLEY WEST WILL BE AVERAGE WET. THE UPPER LEVEL TROUGH OF LOW PRESSURE OVER THE WESTERN BERING SEA WILL ROTATE EAST TO THE BERING SEA COAST BY FRIDAY AFTERNOON. THIS WILL BRING A GOOD SUPPLY OF MOISTURE AND CLOUD COVER AND A MORE STABLE AIRMASS TO WESTERN ALASKA BY FRIDAY AFTERNOON. A RIDGE OF HIGH PRESSURE FROM THE EASTERN GULF OF ALASKA INTO THE EASTERN INTERIOR WILL MOVE EAST EXTENDING OVER BRITISH COLUMBIA INTO THE UPPER YUKON TERRITORY BY SATURDAY MORNING. THE RESULTING UPPER LEVEL AIF FLOW FROM THE SOUTH WILL MOVE EAST, WHICH WILL RESULT IN MORE MOISTURE AND CLOUDS FOR THE COPPER RIVER BASIN BEGINNING FRIDAY NIGHT.

...MCGRATH ZONE INTERIOR...
