**INCIDENT MANAGEMENT SITUATION REPORT
 MONDAY, JULY 18, 1994 0530 MDT
 NATIONAL PREPAREDNESS LEVEL III**

Current Situation: Initial attack activity continued in several areas of the west and increased significantly in northern California and Nevada. Good progress was reported on most large fires in the Southwest and Rocky Mountain Areas due to the monsoonal influence. Mobilization through NICC moderated, while crew demobilization increased from the Southwest and Rocky Mountain Areas.

Rocky Mountain Area Large Fires:

BLACK RIDGE, Southern Ute Agency, BIA. A Type II Incident Management Team (McAtee) is committed. This fire is located in southwest Colorado near San Ignacio. Erratic fire behavior continues to be reported. The fire perimeter enlarged on the southeastern and northern portions but without any major runs. Structures, gas lines, well heads, archaeological sites and power lines continue to be threatened. MAFFS units out of Arizona were used on the fire again yesterday.

UTE CREEK, White River NF. A Type I Incident Management Team (Richer) is committed. Cooler temperatures and light precipitation aided suppression efforts. Potential threats to homes and ranches north of the fire are still a concern. Most the acreage of the fire is within the Flattops Wilderness.

CRD = Craig BLM

Southwest Area Large Fires:

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) is committed. Arrival of a moist, cool airmass has significantly slowed further advance of the Rincon fire. The fire received a small amount of rain throughout the day. The favorable weather allowed direct attack with handcrews on the fire front, handline was almost completed with the remainder expected to be finished today.

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. The fire received approximately 1/2 inch of rain, and the forecast calls for an additional 1-3 inches over the next few days. Rehabilitation on the lines and some demobilization began yesterday. Additional demobilization is planned for today and the transition of the fire back to the forest is planned for Tuesday.

LNF - Lincoln NF GNF = Gila NF
 PNF = Prescott NF ASF = Apache/Sitgreaves NF

Eastern Great Basin Large Fires:

SHINGLE CREEK, Fishlake NF. Fire activity on the fire moderated due to higher humidities, lower temperatures and less wind. The head of the fire is still in terrain that is too hazardous for firefighters.

IFD = Idaho Falls BLM BOD = Boise BLM

Western Great Basin Large Fires:

LONE MOUNTAIN, Elko District, BLM. A Type II Incident Management Team (Fitzgerald) is committed. The fire experienced major runs yesterday afternoon on the north and northeast flanks. Ranches continue to be threatened. The projected size of the fire is 20,000 acres.

BULL RUN, Elko District, BLM. A burnout operation on the east flank was successful and alleviated the threat to four ranches.

Mahogany, Elko District, BLM. This fire is located about 12 miles northeast of Midas, NV. Crews are trying to hold the fire at existing roads in the area. Projected control size is 20,000 acres.

FRENCH BOY, Winnemucca District, BLM. The fire is burning in heavy sage and pinyon-juniper. The fire was quiet through the night, except for one front which had 30-40 foot flame lengths.

COTTONWOOD COMPLEX, Winnemucca District, BLM. This complex is comprised of 4 fires ranging from 10 to 1,400 acres, two of the fires have burned together. Two dozers are being used for structure protection around a ranch.

SIMPSON, Battle Mountain District, BLM. Airtankers made good progress in stopping runs on several flanks yesterday. Historic structures and mines are currently threatened.

Southern Area Incidents:

GEORGIA FLOOD. A Type II Incident Management Team (Kearney) is committed. The team is operating a shipping and receiving distribution center for FEMA in Thomasville, GA. The team continues to clean and prepare the warehouse. A shipment of supplies and equipment from Miami is expected in the next few days.

Outlook: A RED FLAG WATCH has been posted over the higher terrain of southeast Idaho and western Wyoming for dry thunderstorms, and in southeast Oregon for low humidities and gusty winds. A cold front will move over the northwestern U.S. bringing slightly cooler temperatures, lightning that develops will be on the dry side. Arizona and New Mexico will have scattered showers and thunderstorms with temperatures dropping 5 to 10 degrees. Fire activity is expected to increase in the northwestern U.S. after the pass of this cold front.

SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS
 NATIONAL WEATHER SERVICE ANCHORAGE ALASKA
 900AM ADT July 18, 1994 FORECAST FOR TODAY

...WEATHER SYNOPSIS AND MAP DISCUSSION...

A SERIES OF WEAK LOW CENTERS VICINITY KODIAK ISLAND AND EASTERN BRISTOL BAY WILL DISSIPATE THIS AFTERNOON. A TROUGH EXTENDS SOUTHWARD FROM A LOW CENTER NEAR GALENA THROUGH SOUTHWEST ALASKA TO BRISTOL BAY. INTERIOR SECTIONS OF THE MCGRATH ZONE AND THE NORTHERN SECTIONS OF THE MAT-SU ZONE ARE UNSTABLE ENOUGH FOR A GOOD CHANCE OF LATE AFTERNOON THUNDERSTORM DEVELOPMENT. WEAK RIDGE ALONG THE NORTHEAST GULF COAST AND SOUTHEAST PANHANDLE WILL FLATTEN TONIGHT AS THE TROUGH OVER SOUTHWEST ALASKA MOVES EAST. A BUILDING RIDGE OVER THE WESTERN BERING SEA WILL DRIFT EAST TO THE EASTERN BERING SEA AND THE BERING COAST TONIGHT. RAIN WILL END ALONG THE WESTERN GULF COASTAL AREA THIS MORNING AND EASTWARD THROUGH TUESDAY MORNING.

...MCGRATH ZONE INTERIOR...

.CLDS/WX...CLOUDY BECOMING PARTLY SUNNY LATER THIS MORNING, ISOLATED SHOWERS WITH GOOD CHANCE OF LATE AFTERNOON THUNDERSTORM DEVELOPMENT.

.TSTMS...ISOLATED, MOSTLY DRY ALONG THE NORTHERN PORTIONS OF THE ZONE.
