BUCKET WORK CONTINUED TODAY ON FIRE 312 WITH SUCCESS IN SOME AREAS.

THE FIRE HAD AN OPPORTUNITY TO MAKE A CONSIDERABLE ACREAGE INCREASE, AS IT WAS PUSHED BY STRONG SE & SW WINDS OUT OF THE MOUNTAINS ALL DAY. THE FIRE DID NOT MAKE A SIGNIFICANT INCREASE. I.C. BELIEVES THAT THE FUELS IN THIS AREA ARE SOMEWHAT DAMP. IT LOOKS LIKE WET WEATHER OUT OF THE WEST TOMORROW. THERE WAS NO PRECIPITATION ON THE FIRE TODAY. BUCKET WORK WILL CONTINUE TOMORROW, 7-20-94. RECON OF THE FIRE IS SCHEDULED FOR 1030 HRS TOMORROW.

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, JULY 20, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III**

Current Situation: Initial attack activity continued throughout most of the west, but only a couple of fires escaped. Good progress was made on most large fires and all of the Type I Incident Management Teams were released or will be today. Resource mobilization through NICC moderated significantly. Demobilization is occurring in the Southwest, Western Great Basin and Rocky Mountain Areas. MAFFS were released yesterday and will be traveling to their home bases today.

Rocky Mountain Area Large Fires:

CABIN GULCH, Craig District, BLM. This lightning caused fire is located 18 miles southeast of Rangely, Co. The fire spread rapidly in dry fuels when retardant lines failed to hold it during initial attack. Additional resources have been requested for today. One structure, located 1.5 miles from the fire perimeter may be threatened.

UTE CREEK, White River NF. Type I Incident Management Team (Richer) will be demobilized today. Very little increase in acreage occurred yesterday, although isolated torching was still taking place. The threat to homes and ranches north of the fire have been largely eliminated.

INCIDENT NAME	UNIT	ST	SIZE	%	EST	TOTAL	CRW	ENG	HELI	STRUC	ESTS	EST

UTE CREEK	WRF	CO	2,800	95	7/20	648	22	5	7	0	UNK	1.6M

SUA = Southern Ute BIA

Southwest Area Large Fires:

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) is committed. Mop-up continues, however, it is extremely slow and difficult due to the steep terrain, heavy brush, and patchy burn. There is also alot of heat still present within the perimeter. Despite the high humidity, the fire still has not received any precipitation. Mop-up and rehabilitation will continue. Four crews will be demobed today.

RATTLESNAKE, Coronado NF. The fire has been turned over to the Douglas District. A small amount of fire activity still exists. Last precipitation received over 48 hours ago and fuels are drying out as the area heats up. Line construction continues, while mop-up and rehabilitation begins.

MOD = Moab BLM BOD = Boise BLM

Western Great Basin Large Fires:

MAHOGANY, Elko District, BLM. The fire made a wind driven run gaining 400+ acres in 30 minutes yesterday. Flame lengths were 10-15 feet and spotting occurred up to 50 yards ahead of the fire. The fire is burning in a watershed where the threatened Lahonton cutthroat trout are found.

SIMPSON, Battle Mountain District, BLM. A Type II Incident Management Team (Butler) is committed. Crews made good progress with support from aircraft and engines. A sloopover on the west edge of the fire made a short run, but was effectively lined.

Outlook: A RED FLAG WATCH is posted for low humidity and dry lightning in northwest Oregon. The Southwest will experience a decrease in moisture as the monsoonal system moves westward. This system along with the thermal trough on the west coast will cause California to experience strong, gusty winds. A dry, stable air mass will linger over Idaho, Montana, and Wyoming through tonight. Temperatures will remain in the 90's and 100's throughout the west. Initial attack activity is expected to continue with the potential increasing for escaped fires.

ACRES BURNED: Year to date

NORTHERN ALASKA FIRE WEATHER FORECAST FOR WEDNESDAY, JULY 20 1994
 NATIONAL WEATHER SERVICE FAIRBANKS ALASKA
 ISSUED 9:30 AM ADT WEDNESDAY

WEATHER SYNOPSIS AND MAP DISCUSSION.

A disturbance continues to cause cloudiness and shower activity over the eastern interior this morning. The atmosphere is unstable enough for widely scattered afternoon thunderstorms to develop over the Upper Yukon Zone. To the west, a strong low pressure system near St. Paul Island will move east into southwest Alaska late Thursday. Strong southerly flow will again develop through the Alaska Range passes as this low approaches. Rain will begin to overspread the interior from the southwest Thursday.

UPPER YUKON ZONE AND NORTHERN REGION

CLDS/WX..

UPPER YUKON ZONE...Cloudy with morning with showers south and east of Fort Yukon. Mostly sunny from Fort Yukon west. Widely scattered afternoon thunderstorms developing Yukon flats north through Brooks Range.

NORTHERN REGION...Mostly cloudy with showers spreading east to Tok and Northway. Some afternoon breaks in the clouds west of Delta.

MAX. TEMP..65-75

MIN. RH..35-55%

WIND..Mostly southwest 5-15 mph

TSTMS..Widely scattered Upper Yukon Zone.

#D 940720

SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS
 NATIONAL WEATHER SERVICE ANCHORAGE ALASKA
 900AM ADT Wednesday Jul 20 1994 FORECAST FOR THIS AFTERNOON

...WEATHER SYNOPSIS AND MAP DISCUSSION...

A STRONG LOW NEAR SAINT PAUL WILL MOVE TO KUSKOKWIM BAY BY THURSDAY AFTERNOON. THE ASSOCIATED FRONT FROM THE LOW THROUGH DUTCH HARBOR WILL ROTATE EAST IN ADVANCE OF THE LOW AND UNSHORE ALONG THE BRISTOL BAY COAST LATE WEDNESDAY NIGHT. THE UPPER LEVEL LOW IN THE CENTRAL BERING SEA WILL MOVE TO BRISTOL BAY BY THURSDAY AFTERNOON. THE RESULTING UPPER LEVEL WIND FLOW WILL BE MOIST SOUTHWEST INTO SOUTHWEST ALASKA AND SHIFT TO SOUTHERLY INTO SOUTHWEST ALASKA BY THURSDAY AFTERNOON. THIS WILL SUPPLY GOOD MOISTURE WITH HEAVY RAINFALL AMOUNTS LIKELY FOR THE SOUTH SIDE OF THE ALASKA PENINSULA TO KODAK ISLAND THEN INTO SOUTHERN COOK INLET AND THE KENAI PENINSULA. A RIDGE OF HIGH PRESSURE AT EH SURFACE AND ALOFT WILL BUILD OVER THE NORTH GULF COAST AND THE COPPER RIVER BASIN WEDNESDAY AFTERNOON. THIS WILL TEND TO STABILIZE THE AIRMASS OVER THIS REGION, BUT IT WILL LIKELY REMAIN MOSTLY CLOUDY AS MID AND HIGHER LEVEL MOISTURE FLOWS OVER THE RIDGE FROM SOUTHWEST ALASKA.

...MCGRATH ZONE INTERIOR...

.CLDS/WX...MOSTLY CLOUDY WITH ISOLATED EVENING THUNDERSTORMS NORTHEAST OF MCGRATH. HIGHS IN THE MID 50S TO MID 60S. SOUTHWEST WINDS 10 TO 15 MPH BECOMING SOUTHEAST THIS EVENING.

.TSTMS...ISOLATED AVERAGE WET.
