INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, JULY 21, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL II

Current Situation: Initial attack activity continued throughout most of the west. Progress was made on most large fires. Resource mobilization through NICC moderated significantly, while demobilization continues throughout the Southwest, Western Great Basin and Rocky Mountain Areas.

Rocky Mountain Area Large Fires:

CABIN GULCH, Craig District, BLM. The cause of the fire is unknown. It escaped containment lines today due to erratic winds and dry fuels. Helicopter and airtanker support for crews constructing handline is planned for today.

UTE CREEK, White River NF. Small runs occurred in the Flat Tops Wilderness. Spot fires continue to be suppressed. Control problems include hazardous, inaccessible terrain and dry fuels. Current threats are to timber, wildlife habitat and recreational values.

INCIDENT NAME	UNIT	ST	SIZE	%	EST CTN	TOTAL CTN	CRW PERS	ENG	HELI	STRUC LOST	ESTS LOSS	EST COST

FNF = Florida NF's

Outlook: A RED FLAG WATCH for dry lightning is posted for west-central and northwest Nevada, northern California, northwest and central Oregon, and eastern Washington. A high pressure ridge covers the entire western states with a very warm air mass. Monsoon moisture continues to spread across the desert southwest and into southern California reaching up into portions of Nevada, Oregon, and Washington. This combination of limited high level moisture and a very dry lower atmosphere could set off isolated dry lightning storms across portions of northern California, Oregon, and Washington. Scattered wet thunderstorms will concentrate over Arizona, New Mexico, and Colorado. Anticipate initial attack activity to increase in the Northwest with continued demobilization of resources in the Southwest.

NORTHERN ALASKA FIRE WEATHER FORECAST FOR THURSDAY, JULY 21 1994
 NATIONAL WEATHER SERVICE FAIRBANKS ALASKA
 ISSUED 9:30 AM ADT THURSDAY

WEATHER SYNOPSIS AND MAP DISCUSSION.

Low pressure over Bristol Bay this morning will remain nearly stationary and gradually weaken. Meanwhile high pressure is ridging north from the eastern Gulf of Alaska to the Alaska Range. The pressure gradient between these two systems will cause strong and gusty southerly winds through the Alaska Range passes through Friday. Rain associated with the low in Bristol Bay will spread northeast from the McGrath Zone today into portions of the central interior tonight. The atmosphere is too stable for thunderstorm development over the interior today.

UPPER YUKON ZONE AND NORTHERN REGION

CLDS/WX..Partly sunny Yukon Flats. Mostly cloudy elsewhere. Windy through Alaska Range passes.
 MAX. TEMP..66-74
 MIN. RH..25% near Alaska Range; 35%-45% elsewhere.
 WIND...Southerly 20-30 mph with higher gusts through Alaska Range passes. Southwest to east 8-13 mph elsewhere.
 TSTMS..None

#D 940721
