**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, JULY 22, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL II**

Current Situation: Initial attack escalated in the Northwest and North Zone California. In response, NICC mobilized smokejumpers, crews, caterers and showers, communications equipment, airtankers and helicopters. The Southwest Area also had increased initial attack, but no problems were reported. Airtankers are in high demand as several areas are reporting extreme fire indices and dry lightning is forecasted.

Rocky Mountain Area Large Fires:

UTE CREEK, White River NF. Increased fire activity was reported yesterday in the Flat Top Wilderness. Low impact suppression techniques and a confinement strategy are being employed. Numerous spots continue to be suppressed outside the control lines in the non-wilderness section.

North Zone - California

DILLON COMPLEX, Klamath NF. A Type I Incident Management Team has been ordered. The complex is comprised of 46 fires ranging from 5-50 acres. The Dillon Creek area has 9 fires that have the potential to become major incidents.

* No info received.

Northwest Area Large Fires:

FOUR CORNERS, Deschutes NF. This lightning caused fire is located 30 miles southwest of Bend, Oregon. Crane Prairie Resort and Campground have been evacuated. A Type II Incident Management Team (Andrade) has been ordered internally. Control problems are spottling, shifting winds and red slash.

INCIDENT NAME	UNIT	IST	SIZE	%	TEST	TOTAL	CRW	ENG	HEL	STRUC	ESTS	EST

LAD = Lakeview BLM * No info received.

Southern Area Incidents:

GEORGIA FLOOD. A Type II Incident Management Team (Kearney) is committed. The team is operating a receiving and distribution center for FEMA in Thomasville, GA.

Outlook: A RED FLAG WATCH for dry lightning is posted for northern California, most of Oregon, eastern Washington, the Washington Cascades, southwestern Idaho, the panhandle of Idaho and the extreme northwestern portion of Montana. The high pressure ridge centered over the Southwest extending up to the Pacific Northwest shows no signs of change through the next 24 hours. A moist southeast flow touches off widely scattered, mostly wet thunderstorms over the desert Southwest, southern Colorado and southern Utah. As this flow moves into the Pacific Northwest, the moisture decreases and isolated dry lightning activity becomes prevalent. The thunderstorm activity over northern California and southern Oregon could contain more shower activity than the previous storms. Anticipate initial attack activity to intensify and mobilization of resources to increase. Competition for airtankers and helicopters is expected.

SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS
 NATIONAL WEATHER SERVICE ANCHORAGE ALASKA
 900AM ADT July 22, 1994 FORECAST FOR TODAY

...WEATHER SYNOPSIS AND MAP DISCUSSION...

A HIGH PRESSURE RIDGE IS OVER THE EASTERN GULF OF ALASKA AND THE SOUTHEAST PANHANDLE. THIS RIDGE EXTENDS NORTHWARD OVER THE COPPER RIVER AREA AND ON NORTH OVER EASTERN ALASKA. WEATHER REMAINS DRY UNDER THIS AREA OF HIGH PRESSURE. A WEAKENING LOW PRESSURE SYSTEM IS ACROSS THE BRISTOL BAY AND ALASKAN PENINSULA IN THE COLD BAY AREA. A FRONTAL SYSTEM HAS BECOME NEARLY STATIONARY ALONG THE NORTHEAST SIDE OF THE LOW FROM THE YUKON DELTA TO EASTERN KODIAK ISLAND. THE FRONT THEN EXTENDS SOUTHWARD AS A COLD FRONT. CLOUDINESS ASSOCIATED WITH THIS SYSTEM COVERS MOST OF SOUTHERN ALASKA EXCEPT FOR THE SOUTHEAST PANHANDLE. HOWEVER...RAIN IS MAINLY ALONG COASTAL AREAS FROM THE PRINCE WILLIAM SOUND AREA WESTWARD ALONG THE EAST SIDE OF THE KENAI PENINSULA AND ON DOWN ALONG THE EAST SIDE OF THE ALASKAN PENINSULA AND OVER KODIAK ISLAND. THERE ARE SCATTERED SHOWERS INLAND OVER SOUTHERN ALASKA WESTWARD FROM THE COPPER RIVER AREA. THE LOW PRESSURE SYSTEM IS EXPECTED TO CONTINUE A SLOW WEAKENING WITH ONLY A SLIGHT EASTWARD MOVEMENT TODAY AND SATURDAY. HOWEVER...BY SATURDAY NIGHT ANOTHER WEAK LOW IS EXPECTED TO MOVE IN FROM OFF THE BERING SEA AND THEN THE COMBINED SYSTEM SHOULD MOVE ON TO EASTERN SECTIONS OF ALASKA. HIGH PRESSURE IS EXPECTED TO RIDGE IN FROM THE WEST WITH DRYER WEATHER AT THE BEGINNING OF THE COMING WEEK.

AFTERNOON AND EVENING CONVECTIVE SHOWERS OR THUNDERSTORMS SHOULD REMAIN WELL TO NORTH AND EAST OF SOUTHERN ALASKA TODAY AND SATURDAY.

...MCGRATH ZONE INTERIOR...

.CLDS/WX...MOSTLY CLOUDY. SCATTERED SHOWERS IN AFTERNOON...MAINLY AROUND MOUNTAINS. HIGHS LOW TO MID 60S. SOUTHEAST WINDS 10 TO 15 MPH.
 .TSTMS...NONE.
