INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, JULY 28, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL IV

Current Situation: Fire activity in the Northern Rockies, Northwest and Eastern Great Basin continued to escalate as hot, dry weather conditions prevail. A considerable amount of orders for overhead, crews, aircraft, caterers and showers for large fires were processed through NICC. Helicopter, airtanker, hotshot crews, smokejumpers, and various overhead shortages continue. The persistent hot weather has created erratic fire behavior; the 10 fire orders and 18 watchout situations should be reaffirmed with all fire personnel.

At Preparedness Level IV, additional management actions need to be taken, please refer to chapter 27.3.4 of the National Interagency Mobilization Guide.

Northwest Area Large Fires:

TYEE COMPLEX, Wenatche NF. A Type I Incident Management Team (Wands) is committed. The fire near Entiat has destroyed 7 homes and several more are threatened. Structure protection is in place as structures in Navarre Coulee are threatened.

POORMAN, Okanogan NF. A Type I Incident Management Team (Monahan) is committed. New lightning fires have been incorporated and discussions of adding NPS fires are in progress.

LE CLAIR, Warm Springs Agency, BIA. A Type II Incident Management Team (Groshong) is committed. The fire made a major run resulting in the evacuations of Sunnyside and Dry Creek Sub Divisions. One home has been destroyed.

HATCHERY COMPLEX, Wenatchee NF. A Type I Incident Management Team (Porter) is committed. The fire has crossed the Wenatchee River and Highway 2. The sherriff department requested a voluntary evacuation of a campground and a 12 unit condo. Ground suppression was suspended, resulting in air tactics only. The fire has the potential to burn into the Alpine Lakes Wilderness.

LAKEBEDS, Yakima Agency, BIA. A Type II Incident Management Team (Lukens) is committed. Control lines on the south end of the fire were lost to this fire burning in heavy timber, mostly conifers. Crews were pulled off the fire several times due to explosive fire behavior.

MURRAY COMPLEX, The RIGGS fire in this complex is threatening a University of Washington Observatory and other structures. There are 6 fires included in this complex.

BUTLER COMPLEX, WASHINGTON STATE. The BUTLER fire crossed control lines in several places and is threatening several homes, 2 businesses, state park and powerline.

HIGHLANDS COMPLEX, WASHINGTON STATE. This complex is comprised of three fires caused by children playing with matches.

MENDENHALL COMPLEX, Siskiyou NF. A Type I Incident Management Team (Eddy) is committed. Single and multiple pockets of fuel within the perimeter continue to burn; extremely low fuel moistures and grass understory have shown a high rate of spread. The complex consists of 9 original fires and 2 in the Kalmiopsis Wilderness.

RIDDLE RANCH, Burns District, BLM. The fire is no longer a threat to the Riddle Brothers Ranch. One structure has been destroyed by the fire.

REPUBLIC COMPLEX, Colville NF. A Type II Incident Management Team (Furlong) is committed. This complex is comprised of 9 fires. Six small ones are lined and the 3 larger ones continue to spread slowly.

OLSON COMPLEX, Colville NF. This complex is located 25 miles east of Colville and is comprised of 20 fires. The fire jumped tractor lines and continues to be difficult to control. The fire continues to threaten a plantation, wildlife refuge and wilderness.

LITTLE FERRY CANYON, Prineville District BLM. The fire made runs to the northwest in Curry Canyon and slopping over into Little Ferry Canyon. Crews backed off from direct attack and focused on indirect attack.

MADSTONE, Siskiyou NF. This fire is a confinement fire deep inside the Kalmiopsis Wilderness. Rock predominates the area with interspersed vegetation, 60% of the perimeter is cold with no available fuels to burn. Monitoring continues daily.

Northern Rockies Area Large Fires:

NIRADA, Flathead Agency, BIA. A Type II Incident Management Team (Spradlin) is committed. Dry fuels and limited resources are making containment difficult. Threats are to high value timber and cultural sites.

HENRY PEAK, Montana State, Northwestern Land Office. A Type II Incident Management Team (Suenram) is committed. The fire is burning in heavy timber, slash and grass. Structure protection taking place in the McLaughlin Creek drainage where 2 homes are immediately threatened, all residents of the drainage have evacuated. The fire has burned off Forest Service land on to private commercial timber land, \$175,000 of log decks and harvested timber have been destroyed.

Southern Area Incidents

GEORGIA FLOOD. A Type II Incident Management Team (Kearney) has been released.

Outlook: A RED FLAG WARNING has been posted for dry lightning and low humidity in western Montana. A RED FLAG WARNING has been posted for strong westerly winds and low humidity for the east slopes of eastern Oregon. The hot and dry weather pattern will remain over the western U.S. as strong, high pressure remains stationary over the Intermountain West. Widely scattered afternoon and evening thunderstorms are forecast for most of the interior west. Temperatures will once again range in the 80's to 100 interior west and near 110 Southwest deserts. Fire activity is expected to accelerate as weather conditions prevail. Resource availability will remain poor and no relief is in sight.

NORTHERN ALASKA FIRE WEATHER FORECAST FOR THURSDAY, JULY 28 1994
 NATIONAL WEATHER SERVICE FAIRBANKS ALASKA
 ISSUED 9:30 AM ADT THURSDAY

WEATHER SYNOPSIS AND MAP DISCUSSION.
 Weak upper level trough with moist, unstable air lies nearly stationary over interior Alaska. A front approaching west coast will weaken as it drifts eastward. Air becoming a little more stable Friday as high pressure aloft strengthens over interior Alaska.

UPPER YUKON ZONE AND NORTHERN REGION
 CLDS/WX..Partly cloudy to cloudy with light showers eastern sections and isolated thunderstorms and showers western sections.
 MAX. TEMP..Mostly in 70s.
 MIN. RH..40 to 50%.
 WIND..Variable 4 to 8 mph outside of shower areas.
 TSTMS..Isolated wet, mainly western sections.

#D 940728

SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS
 NATIONAL WEATHER SERVICE ANCHORAGE ALASKA
 900AM ADT July 28, 1994 FORECAST FOR TODAY

...WEATHER SYNOPSIS AND MAP DISCUSSION...

A LOW PRESSURE SYSTEM OVER THE SOUTHEASTERN GULF OF ALASKA WILL MOVE ONLY SLIGHTLY EASTWARD DURING THE NEXT COUPLE OF DAYS. MOISTURE CONTINUES TO STREAM NORTHWARD OVER THE SOUTHEAST PANHANDLE ALONG THE EAST SIDE OF THE LOW. A RIDGE OF HIGH PRESSURE WITH DRYER WEATHER EXTENDS UP FROM THE PACIFIC OVER THE KODIAK ISLAND-KENAI PENINSULA AREAS INTO SOUTH CENTRAL ALASKA. DRYER WEATHER WITH THIS SYSTEM SHOULD PERSIST THROUGH SATURDAY. TO THE WEST...A FRONTAL SYSTEM HAS BEEN ROTATING EASTWARD OUT OF A LOW PRESSURE SYSTEM OVER THE WESTERN BERING SEA. MOISTURE ALONG AND AHEAD OF THE FRONT IS MOVING UP ALONG THE ALASKAN PENINSULA AND SOUTHWEST COASTAL AREA AND NORTHWARD OVER THE BERING SEA COAST. MOISTURE IS EXPECTED TO LINGER IN THIS AREA DURING THE NEXT COUPLE OF DAYS AS THE INCOMING FRONT WEAKENS AND IS FOLLOWED BY ANOTHER FRONT BY LATE FRIDAY.

THE THERMAL LOW PRESSURE TROUGH IS WELL UP OVER INTERIOR AND NORTHERN ALASKA TODAY. AFTERNOON AND EVENING CONVECTIVE SHOWERS AND THUNDERSTORMS ALONG AND NEAR THE TROUGH SHOULD BE MAINLY TO THE NORTH AND EAST OF THE SOUTHERN ALASKAN REGION. HOWEVER...THERE MAY BE A FEW CONVECTIVE THUNDERSTORMS ALONG THE ALASKAN RANGE OVER NORTHERN SECTIONS OF THE UPPER KUSKOKWIM VALLEY AND EASTWARD OVER NORTHERN MOST SECTIONS OF THE SUSITNA AND COPPER RIVER AREAS.

...MCGRATH ZONE INTERIOR...

.CLDS/WX...PARTLY SUNNY. WIDELY SCATTERED AFTERNOON OR EVENING SHOWERS. HIGHS IN MID 70S. LIGHT MOSTLY SOUTHWEST WINDS.

.TSTMS...ISOLATED NORTHERN SECTION IN AFTERNOON OR EVENING ... AVERAGE WET.
