**INCIDENT MANAGEMENT SITUATION REPORT**  
**THURSDAY, AUGUST 4, 1994 - 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL V**

**Current Situation:** Initial attack and escaped fires occurred in the Northwest, Northern Rockies, Southwest and the Eastern Great Basin Areas due to dry lightning. Six Type II Incident Management Teams were mobilized in these areas for new escaped fires. The hot, dry and windy conditions continue to hamper firefighter's efforts to control large fires.

Col. Anthony Palermo is the Task Force Commander for the Marine contingent assigned to the Tye fire. Col. William S. Maddox is the Task Force Commander for the U.S. Army assigned to the Idaho City Complex and the Squaw Peak fire.

The NIFC Training Cadre completed training the 3/82nd Field Artillery Battalion, 1st Calvary Division. Deployment is in progress to the Squaw Peak fire on the Lolo NF.

The NIFC MAC Group has granted NICC authority to move those national resources in high demand to Geographic Areas where activity is determined to be more critical. Criteria described in the National Mobilization Guide, Chapter 10 will guide this process.

**Northwest Area Large Fires:**

HATCHERY COMPLEX, Wenatchee NF. A Type I Incident Management Team (Porter) and a State Team (Messenbrink) are committed. Five CH-47 helicopters from the 214th Aviation Unit, Fort Lewis, WA. are assigned. The complex is comprised of the HATCHERY and RAT CREEK fires. Crews made progress yesterday, although, there were some spots across the Tumwater side of the Hatchery fire. The Hatchery fire is 40% contained and the Rat Fire is 30% contained.

ROUND MOUNTAIN COMPLEX, Wenatchee NF. A Type I Incident Management Team (Richer) and Washington State are managing this incident. The complex is comprised of the ROUND MOUNTAIN, EIGHTMILE, BLACKJACK 1, BLACKJACK 2, LEMAH/ESCONDIDO. All the fires, except Round Mountain are being managed in a confinement strategy. Due to poor visibility caused by smoke, IR flights have been unsuccessful in their attempts to pinpoint the size, location, and activity of the fires within the Alpine Lakes Wilderness.

TYEE COMPLEX, Wenatchee NF. A Type I Incident Management Team (Wands) is committed. The 5th Battalion, 11th Marine Regiment (Lt. Col. Rick Lindsey, Commander) and the 1st Battalion, 5th Marine Regiment (Lt. Col. Dave Bonwit, Commander) are committed. Over the last two days fire activity has increased significantly. The fire spotted over Entiat Ridge, and major flame fronts in the Hornet and Mad River drainages caused a 40,000 foot smoke plume. The fire has crossed 2 lines between First and 25-mile Creeks. Residents in little Chumstick area are under a level 2 evacuation alert.

COPPER BUTTE, Colville NF. A Type I Incident Management Team (Eddy) is committed. Tremendous amounts of ground fuels are making progress difficult. The fire is burning toward Belcher and Midnight Mountain onto BLM land in the headwaters of Lambert Creek. Structures in Lambert Creek are threatened.

OKANOGAN COMPLEX, Okanogan NF. A Type I Incident Management Team (Monahan) and a Type II Incident Management Team (Burdick) are committed. The complex is comprised of the POORMAN, THUNDER, WAR CREEK, BURNT SAW RAINBOW/BOULDER/ BUTTE, and MISC. ABC fires. Burnout operations on the Thunder fire have almost been completed, which contributed to the acreage increase. Heli-rappellers are being utilized in the Stehekin area.

KLICKITAT COMPLEX, Yakima Agency, BIA. A Type I Incident Management Team (Meuchel) is committed. This complex is comprised of the McCREEDY, YEDLICK, HUCKLEBERRY and 12 small spot fires. Crews established structural protection for the Yakima Nation Youth Camp.

SWAMP CREEK, Vale District, BLM. This fire is burning in grass and juniper 30 miles east of Malheur Lake.

LAKEBEDS, Yakima Agency, BIA. A Type II Incident Management Team (Lukens) is committed. The fire blew out on the west side threatening structures; some historical buildings. The fire is torching, crowning, and spotting up to a half mile.

INDIAN ROCKS, Malheur NF. A Type II Incident Management Team (Lindsey) is committed. This fire is burning in very flashy fuels in the Indian Rocks Scenic Area. The fire was 95% lined when erratic winds caused the fire to spot outside. Crews were removed from the line.

SNAKE RIVER COMPLEX, Wallowa-Whitman NF. A Type II Incident Management Team (Phenix) is committed. This complex is comprised of the THORN CREEK, SADDLE CREEK, TRIANGLE MOUNTAIN, HAAS HOLLOW, and SWAMP CREEK fires.

**Northern Rockies Area Large Fires:**

TRAIL, Bitterroot NF. A Type II Incident Management Team (Wetzsteon) is committed. This fire is burning in very heavy fuel 12 miles east of Hamilton, MT. Crews were pulled off the fire due to erratic fire behavior yesterday.

EAST FORK CHAMBERLIN, Montana State. A Type II Incident Management Team (Forrester) is committed. This fire is burning in high elevation lodgepole and alpine fir stands 8 miles southwest of Ovando in the Garnet range. All fire personnel and equipment were also pulled off this fire.

LIVERMORE, Blackfeet Agency, BIA. A Type II Incident Management Team (Danforth) is committed. The fire has the potential to threaten the town of St. Mary, MT.

PERMA, Flathead Agency, BIA. A Type II Incident Management Team (Spradlin) is committed. The fire continues to spread to the south with active afternoon spotting and uphill runs. Crews continue to flank the fire with direct attack.

NINEMILE COMPLEX, Lolo NF. A Type II Incident Management Team (Bennett) is committed. This Complex is comprised of the BEAVER SLOUGH, SLAUGHTER HOUSE, SQUAW PEAK, BUTLER CREEK, WEST SIX MILE and ROCK CREEK fires. Butler Creek, Six Mile, and Rock Creek are controlled and Squaw Peak is contained. Beaver Slough and Slaughterhouse are not yet contained, but good progress is being made. The U.S. Army Battalion will arrive on the incident today.

HENRY PEAK, Northwestern Land Office, Montana State. A Type II Incident Management Team (Suenram) is committed. Mop-up continuing, line construction and burn out nearly complete on SE portion of the fire. Demobilization of some resources occurred for I.A. to other incidents.

ELK RIVER COMPLEX, Idaho State. A Type II Incident Management Team (Cowin) is committed. Five new fires were found today, increasing the total to 95. Ten fires are staffed but not lined, 15 fires are lined and 63 are in mop-up or patrol status. Mop-up activities are the primary focus for today.

**Eastern Great Basin Area Large Fires:**

IDAHO CITY COMPLEX, Boise NF. A Type I Incident Management Team (Leibersbach) and a Type II Incident Management Team (Butler) are committed. The 20th Engineer Battalion, 1st Calvary Division (Lt. Col. Bruce Porter, Commander) is committed. The Complex consists of the BANNACK FIRE and numerous small fires. The Bannack fire is contained. Crews were pulled back when the Rabbit fire crossed the line on the west side. Rolling debris is causing the North Fork I fire to increase. Low relative humidity is causing erratic fire behavior.

CORRAL CREEK, Payette NF. A Type II Incident Management Team (Barber) is committed. Two fires burned together resulting in this 300 acre fire.

BLACK WIDOW, Fishlake NF. High temperatures and low humidities are hindering suppression efforts.

COLT, Salmon NF. Steep terrain and hot spots close to the line are causing control problems.

IFD = Idaho Falls BLM

**North Zone - California Large Fires:**

DILLON COMPLEX, Klamath NF. A Type I Incident Management Team (Lee) is committed. This complex is comprised of the JACK/XX/CEDAR, KELSEY/WILLIS, HARRINGTON/DIVIDE and 16 other contained fires. Aggressive direct attack is taking place on the Harrington and Kelsey, although smoke continues to inhibit the crew shuttles by helicopter. Minimal activity was experienced on the Dillon Creek fire as the firing operations continue to hold. The fire continues to back down into the drainage of the North Fork of Dillon Creek, but IR shows it holding there.

**Outlook:** A RED FLAG WARNING has been posted for eastern Washington for dry lightning and strong west winds in the Cascade valleys. A RED FLAG WARNING has been posted for the east slopes of the Oregon Cascades for strong west winds and low humidities. Strong high pressure extends northward from Arizona through the Great Basin and into the Northern Rockies. A trough of low pressure remains off the Pacific Northwest coast. A dry southwesterly flow of air covers California, Nevada, Utah, southern Idaho and most of Arizona. Moist, unstable air will continue to produce widely scattered thunderstorms from eastern Washington and eastern Oregon into the northern Great Basin and the Rocky Mountain Area. A few thunderstorms will develop in eastern Arizona. Thunderstorms will generally be dry in eastern Washington and parts of eastern Oregon and western Montana. An increase of marine air in western Washington and western Oregon will cause gusty west winds on the east slopes of the Cascades. New fire activity is inevitable in the Northwest and Northern Rockies with continuing dry thunderstorms forecast. Military personnel and helicopters that have been deployed are relieving some of the resource shortages.

NORTHERN ALASKA FIRE WEATHER FORECAST FOR THURSDAY, AUGUST 4 1994  
 NATIONAL WEATHER SERVICE FAIRBANKS ALASKA  
 ISSUED 9:30 AM ADT THURSDAY

WEATHER SYNOPSIS AND MAP DISCUSSION. ....

A strong upper ridge will strengthen through Saturday with record heat building over the central and eastern Interior. A surface low over southwest Alaska has weakened overnight and a frontal boundary extends northeast from the low to Huslia and Bettles. Behind the front, skies have cleared and temperatures will warm considerably today. Cloudiness and a few showers will persist ahead of the front. The atmosphere is unstable enough for isolated afternoon convection today and Friday over the southeastern Interior.

UPPER YUKON ZONE AND NORTHERN REGION .....

CLDS/WX..Mostly sunny and very warm. Isolated afternoon thunderstorms east of Fairbanks and southeast of Circle.

MAX. TEMP..Mostly 80's

MIN. RH..25-40%

WIND..Mostly light east.

TSTMS..Isolated (average wet) south and east of Circle and east of Fairbanks.

#D 940804

SITE FCSTS..STATIONS WITH ZEROS DID NOT HAVE DATA FOR A FORECAST

SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS  
 NATIONAL WEATHER SERVICE ANCHORAGE ALASKA  
 900AM ADT August 4, 1994 FORECAST FOR TODAY

...WEATHER SYNOPSIS AND MAP DISCUSSION...

CIRCULATION AROUND THE TOPSIDE OF A LOW PRESSURE SYSTEM OFF THE BRITISH COLUMBIA COAST CONTINUES TO BRING SOME MOISTURE OVER THE SOUTHEAST PANHANDLE. A WEAK LOW PRESSURE IS OVER BRISTOL BAY WITH AND OCCLUDED FRONT OUT OF THE LOW ACROSS THE UPPER ALASKAN PENINSULA AND WESTERN KODIAK ISLAND AND ON ACROSS THE SOUTHWESTERN GULF OF ALASKA. A WEAK TROUGH OF LOW PRESSURE EXTENDS NORTHWEST FROM THE LOW INTO THE NORTON SOUND AREA. MOISTURE WITH THIS SYSTEMS EXPECTED TO LINGER OVER THE SOUTHWEST BUT SHOULD DRIFT TO THE WEST AS A HIGH PRESSURE SYSTEM OVER THE NORTHERN GULF OF ALASKA AND OVER EASTERN ALASKA BUILDS WESTWARD. DRYER...WARMER WEATHER UNDER THIS HIGH OVER THE EAST SHOULD SPREAD INTO EASTERN SECTIONS OF THE KUSKOKWIM AND BRISTOL BAY COASTAL AREAS AS THE HIGH BUILDS TO THE WEST. AS AFTERNOON TEMPERATURES BECOME WARMER ACROSS THE SOUTH... WIDELY SCATTERED AFTERNOON AND EVENING CONVECTIVE SHOWERS OR THUNDERSTORMS SHOULD DEVELOP WESTWARD FROM THE COPPER RIVER AREA ACROSS THE MATSU-UPPER KENAI AREA INTO EASTERN SECTIONS OF THE KUSKOKWIM-BRISTOL BAY COASTAL AREA. THIS CONVECTIVE ACTIVITY SHOULD BE MAINLY AROUND MOUNTAINS.

...MCGRATH ZONE INTERIOR...

.CLDS/WX...MOSTLY CLOUDY WEST AND PARTLY SUNNY IN EAST. WIDELY SCATTERED AFTERNOON OR EVENING SHOWERS IN EAST...MAINLY AROUND MOUNTAINS. HIGHS FROM NEAR 70 SOUTHWEST TO NEAR 80 NORTHEAST. LIGHT WINDS.

.TSTMS...WIDELY SCATTERED IN AFTERNOON OR EVENING IN EAST...MAINLY AROUND MOUNTAINS. AVERAGE WET.
