INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, AUGUST 5, 1994 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL V

Current Situation: Numerous new fires along with severe burning conditions continue the high level of activity in the western states. Type II Incident Management Teams were mobilized in the Northern Rockies, Eastern Great Basin and Northwest. Two Type I Incident Management Teams were mobilized, one in the Eastern Great Basin and one in North Zone California. Reassignments continue to occur, with shortages of some resources becoming more common.

Colonel Anthony Palermo USMC, is the Task Force Commander for the Marine contingent assigned to the Tyee, Copper Butte and Okanogan Complex/fires. Colonel William S. Maddox USA, is the Task Force Commander for the U.S. Army contingents assigned to the Idaho City and Ninemile Complexes.

Five Blackhawk helicopters from the 4th Battalion, 227 Aviation Regiment, 1st Calvary Division, Fort Hood Texas are expected today to support the Idaho City Complex.

The 6th Army has been tasked to provide 3, CH-47 helicopters for the Copper Butte and Okanogan Complex in northeastern Washington.

Northwest Area Large Fires:

HATCHERY COMPLEX, Wenatchee NF. A Type I Incident Management Team (Porter) and a State Team (Messenbrink) are committed. Five CH-47 helicopters from the 214th Aviation Unit, Fort Lewis, WA. are assigned. Twenty-five National Guard crews will arrive at base camp today and begin working day shift tomorrow. The complex is comprised of the HATCHERY, RAT CREEK and LOWER VALLEY fires. Lower temperatures and higher humidities have helped with control efforts. The Hatchery fire is 35% contained, the Rat Creek is 25% contained and Lower Valley is 15% contained.

TYEE COMPLEX, Wenatchee NF. A Type I Incident Management Team (Wands) is committed. The 5th Battalion, 11th Marine Regiment (Lt. Col. Rick Lindsey, Commander) and the 1st Battalion, 5th Marine Regiment (Lt. Col. Dave Bonwit, Commander) are committed. Tractor line was constructed at Entiat Ridge where the fire is approximately 3/4 mile over the ridge. Lower temperatures and higher humidities are creating cautious optimism. Fire is within 2-1/2 miles of Maverick Saddle and pushing across Billy Ridge on the westside.

COPPER BUTTE, Colville NF. A Type I Incident Management Team (Eddy) is committed. The fire continues to actively burn at night with increased activity during the day. Fire spread to the northwest was caused by high winds accompanying thunderstorm activity. Long range spotting up to one mile north of the fire perimeter is occurring. Evacuation of Lambert Creek is still in effect, with imminent evacuation of South Fork of St. Peter's Creek and an evacuation alert is on in the North Fork of St. Peter's Creek. No structures have been lost to date.

PALMER COMPLEX, Washington State. This complex is burning in sagebrush and scattered timber 15 miles south of Oroville, WA. The complex is comprised of the SIMILKAMEEM, ELLEMEHAM, GRANDVIEW and HOT LAKE fires. The Similkameem fire is burning in Canada and the US. Acreage reported is for acres only in the US.

OKANOGAN COMPLEX, Okanogan NF. A Type I Incident Management Team (Monahan) and a Type II Incident Management Team (Burdick) are committed. The complex is comprised of the POORMAN, THUNDER, WAR CREEK, BURNT SAW RAINBOW/BOULDER/ BUTTE,

and MISC. ABC fires. Major increase in acreage is due to the burnout operation on the Thunder fire. Boulder and War Creek fires have burned together. Continuing initial attack in the complex and on the Forest is hampering suppression efforts.

KLICKITAT COMPLEX, Yakima Agency, BIA. A Type I Incident Management Team (Meuchel) is committed. This complex is comprised of the McCREEDY, YEDLICK, HUCKLEBERRY and 12 small spot fires. Burnout continued last night to secure newly constructed lines. Line construction was completed across the head of the fire in Huckleberry Creek. Spotting to the north side of the Klickitat River continues to be a concern as the fire backs down the slope.

SWAMP CREEK, Vale District, BLM. This fire is located 30 miles east of Malheur Lake and is burning in grass and juniper.

LAKEBEDS, Yakima Agency, BIA. A Type II Incident Management Team (Lukens) is committed. The south branch of the main fire is staffed by the Butler Complex. Two spot fires were identified outside the line. There was no significant increase in acreage today.

INDIAN ROCKS, Malheur NF. A Type II Incident Management Team (Lindsey) is committed. Fire activity picked up yesterday afternoon. Spotting continues to be a problem with numerous starts outside the main fire perimeter.

SNAKE RIVER COMPLEX, Wallowa-Whitman NF. A Type II Incident Management Team (Phenix) is committed. This complex is comprised of the THORN CREEK, SADDLE CREEK, TRIANGLE MOUNTAIN, HAAS HOLLOW, and SWAMP CREEK fires. Thunderstorms are predicted for this afternoon. Fires pose threats to Spring/Summer Chinook fisheries habitat, National Recreation Area, Bull trout, Rapid River fish hatchery headwaters, historical structures and domestic livestock.

CLOVER CREEK, Vale District BLM. This fire is located 9 miles Southwest of Ironside, OR. Threats include ranch improvements and deer winter range.

GORMAN CREEK, Burns District, BLM. This fire is located 24 miles southeast of Burns. Fire has burned into large juniper eradication area and steep rocky terrain.

STARVATION COMPLEX, Wallowa-Whitman NF. This fire is located 18 miles north of Enterprise, Oregon. No additional information available.

Northern Rockies Area Large Fires:

LIVERMORE, Blackfeet Agency, BIA. A Type II Incident Management Team (Danforth) is committed. Gusty morning winds produced a 1/4 acre spot fire on the slope above the community of St. Mary and and Malmstrom Air Force Recreation Area Site, the spot was contained with assistance from helicopter water drops. Extreme fire behavior was experienced in the afternoon as large islands of heavy fuel within the perimeter burned, some line was also lost.

PERMA, Flathead Agency, BIA. A Type II Incident Management Team (Spradlin) is committed. Light rain received on the fire assisted crews in suppression efforts. Burnout operations on the southeast flank reinforced constructed line. If the lines hold through the the winds today, demobilization of crews is expected on Saturday.

NINEMILE COMPLEX, Lolo NF. A Type II Incident Management Team (Bennett) is committed. The 3/82nd Field Artillery Battalion, 1st Calvary Division (Lt. Col. Marcus Dudley) is committed. This Complex is comprised of the BEAVER SLOUGH, SLAUGHTER HOUSE, SQUAW PEAK, BUTLER CREEK, WEST SIX MILE and ROCK CREEK fires. All fires are controlled except the Beaver Slough and Slaughterhouse, which are close to being contained. Red flag winds will test the lines on all the fires tomorrow.

HENRY PEAK, Northwestern Land Office, Montana State. A Type II Incident Management Team (Suenram) is committed. Reassignment of resources is likely today with major demobilization expected Saturday and Sunday.

ELK RIVER COMPLEX, Idaho State. A Type II Incident Management Team (Cowin) is committed. A thunderstorm that passed over the area started 12 new fires. The majority of new fires were less than acre with one that started in logging slash and burned 15 acres. There are now a total of 105 fires in this complex.

SUPERIOR SUPPORT, Lolo NF. A Type II Incident Management Team (Bosworth) is committed. This complex is comprised of 13 fires ranging from spots to 40 acres and one large fire at 225 acres. The smaller fires are in various stages of control and mop-up.

EAST FORK CHAMBERLIN, Montana State. A Type II Incident Management Team (Forrester) is committed. Timber is the primary resource at risk on BLM and private land.

PASS CREEK, Idaho Panhandle NF. A Type II Incident Management Team (Kechter) is committed. The fire is threatening Caribou winter habitat, Roundtop Research Natural Area and Roundtop Lookout north of the fire.

TRAIL, Bitterroot NF. A Type II Incident Management Team (Wetzsteon) is committed. This fire is burning in very heavy fuel 12 miles east of Hamilton, MT. Westerly winds and possible blow-up conditions are forecast for today.

A Type II Incident Management Team (Hart) has been committed to the St. Joe fires on the Idaho Panhandle NF. No other information available.

Eastern Great Basin Area Large Fires:

BLACKWELL, Payette NF. A Type I Incident Management Team (Birch) is committed. Current threat is to structures, including multi-million dollar homes, and a high visibility recreational area. Control problems are torching, spotting (up to 1/2 mile), and four fire fronts, all a result of erratic shifting winds. The fire is burning in heavy and dead fuels. Last night, firefighters were removed from the line due to intense heat and severe fire behavior.

IDAHO CITY COMPLEX, Boise NF. A Type I Incident Management Team (Leibersbach) and a Type II Incident Management Team (Butler) are committed. The 20th Engineer Battalion, 1st Calvary Division (Lt. Col. Bruce Porter, Commander) is committed. The Complex consists of the BANNACK FIRE and numerous small fires. The North Fork fires continue to increase in the steep terrain. Low humidities and high temperatures resulted in flare-ups and difficulty in holding some the control lines. Training has begun for the military personnel who will relieve fire crews already on the line.

CORRAL CREEK, Payette NF. A Type II Incident Management Team (Barber) is committed. This complex consists of the CORRAL CREEK and the WARM SPRINGS fires. Both fires made major runs today. Two sheep herds were relocated; and a logging camp and 25 recreationists were evacuated.

ER KNOLL, Salt Lake City District BLM. A ranch and two structures are currently threatened. No additional information available at this time.

BURNT HOLLOW, Fishlake NF. Light, flashy fuels and erratic fire behavior are causing control problems. Yesterday, large fires whirls were observed and the fire was backing into the wind with 5 foot flame lengths.

EAST HARKER, Salt Lake City District BLM. A Type II Incident Management Team (Fitzgerald) is assigned. No other information reported.

DRY CANYON II, Utah State. This lightning caused fire is west of Randolph, Utah. Private timber, cattle, and grazing allotments are affected.

BLACK WILLOW, Fishlake NF. Current threats are to rangeland and watershed. No other information available.

EDGAR, Wasatche-Cache NF. A Type II Incident Management Team (McAtee) is assigned. No other information reported.

North Zone - California Large Fires:

CRYSTAL, Tahoe NF. A Type I Incident Management Team (Dougherty) is committed. The fire started in Hoke Valley approximately 15 miles northeast of Truckee. The fire has burned 8 homes in the Sunrise Basin Subdivision. The north side of the community of Verdi, NV. and a subdivision have been evacuated. The fire has burned onto the Toiyabe NF. Control problems include erratic winds and heavy loads of bug killed timber.

DILLON COMPLEX, Klamath NF. A Type I Incident Management Team (Lee) is committed. This complex is comprised of the JACK/XX/CEDAR, KELSEY/WILLIS, HARRINGTON/DIVIDE and 16 other contained fires. Efforts to build handline on the Harrington and Kelsey continue, but are hampered by smoke which inhibits helicopters to get crews to the line.

Outlook: A RED FLAG WARNING has been posted for isolated dry lightning in central Idaho and for increasing southwest to west winds in northern Idaho and western Montana. The trough of low pressure is edging closer to the Pacific Northwest, this will bring a few showers to the coastal area and a little cooler temperatures to the Northwest Area. The east slopes of the Cascades and western Montana will have gusty west winds. Central Idaho and eastern Utah will have mostly dry thunderstorms. Wyoming, Colorado, New Mexico and central and eastern Arizona will have widely scattered thundershowers. Fire activity will increase as holdover fires are detected and new fires emerge from the forecasted dry lightning. Initial attack resources are stretched to the limit with all the new activity from the past few days.

SOUTHERN ALASKA FIRE WEATHER AND CANADIAN DROUGHT INDEX FORECASTS
NATIONAL WEATHER SERVICE ANCHORAGE ALASKA
900AM ADT August 5, 1994 FORECAST FOR TODAY

...WEATHER SYNOPSIS AND MAP DISCUSSION...

ALOFT...A RIDGE OF HIGH PRESSURE EXTENDS OUT OF CANADA OVER MAINLAND ALASKA WHILE LOW PRESSURE SYSTEMS ARE OFF THE BRITISH COLUMBIA COAST AND SOUTH OF THE ALASKAN PENINSULA. AT THE SURFACE ...A STATIONARY LOW PRESSURE SYSTEM ALONG THE BRITISH COLUMBIA COAST CONTINUES TO FEED MOISTURE WESTWARD ALONG THE SOUTH CENTRAL COASTAL AREA OF ALASKA. MOISTURE ALSO PERSISTS AROUND ANOTHER WEAK LOW OVER THE UPPER ALASKAN PENINSULA AND BRISTOL BAY AREAS AS WELL AS TO THE NORTH ALONG A TROUGH OF LOW PRESSURE OVER THE KUSKOKWIM VALLEY. THIS SYSTEM SHOULD CONTINUE TO WEAKEN AS THE LOW DRIFTS TO THE NORTHWEST. HIGH PRESSURE EXTENDS NORTHWARD OUT OF THE GULF OF ALASKA OVER THE KENAI PENINSULA-MATSU AREA. ANOTHER WEAK HIGH IS JUST OFF THE BERING SEA COAST. AN A THIRD...STRONGER HIGH IS ALONG THE ARCTIC COAST FROM NORTHEAST ALASKA EASTWARD. THE THERMAL LOW PRESSURE TROUGH IS OVER INTERIOR ALASKA FROM EAST OF THE SEWARD PENINSULA ACROSS THE FAIRBANKS AREA THEN EAST AND SOUTHEAST INTO CANADA. AFTERNOON AND EVENING CONVECTIVE SHOWERS AND THUNDERSTORMS IN WARM TEMPERATURES ALONG AND SOUTH OF THIS TROUGH SHOULD AFFECT SOUTHERN ALASKA FROM THE COPPER RIVER AREA WESTWARD INTO EASTERN SECTIONS OF THE KUSKOKWIM VALLEY.

...MCGRATH ZONE INTERIOR...

.CLDS/WX...PARTLY SUNNY. WIDELY SCATTERED AFTERNOON OR EVENING SHOWERS OVER THE NORTH AND EAST. HIGHS FROM THE MID 70S IN SOUTHWEST TO MID 80S IN NORTHEAST. LIGHT WINDS.
.TSTMS...WIDELY SCATTERED IN AFTERNOON OR EVENING AROUND NORTHERN AND EASTERN MOUNTAINS. AVERAGE WET.
