**INCIDENT MANAGEMENT SITUATION REPORT  
THURSDAY, AUGUST 3, 1995 - 0530 MDT  
NATIONAL PREPAREDNESS LEVEL III**

\*\*\* SAFETY COMES FIRST ON EVERY FIRE, EVERY TIME. \*\*\*

**Current Situation:** Fire activity moderated in most Areas yesterday. Good progress was made in meeting containment objectives in the Southwest. Requests for resources through NICC decreased.

**Southwest Area Large Fires:**

SHOVEL/GREEN COMPLEX, Coronado NF. A Type II Incident Management Team (Moore) is committed. The Green fire is 100% contained and the Shovel fire is 90% contained. Suppression efforts held the fire within the perimeter with assistance from helicopter bucket drops. The fire continues to pose a threat to a multi-million dollar Astro-Physical site, the Summerhaven Community and a radar site for Tucson International Airport.

**North Zone California Large Fires:**

PONY, Klamath NF. A Type II Incident Management Team (Gilpin) is committed. The current threat is to critical timber habitat for threatened and endangered wildlife and fish species. Steep slopes, poor access, and rolling material are hindering control efforts. An inversion over the fire lasted most of the day yesterday. The fire team is utilizing field monitors and advisors from the Karuk Tribe to help protect cultural sites where fire lines are being constructed. The fire is just east of the border of last year's Dillon Complex, which occurred during the same period.

**OUTLOOK:** A continuing upper level high pressure system will remain over the Four Corners area bringing little change in the weather. Very warm and dry weather will prevail over much of the West. A weak upper level low pressure system will move over the Pacific Northwest. Widely scattered thunderstorms with a possibility of dry lightning is forecast for Arizona and northern Colorado. Isolated thunderstorms are expected in southern California, New Mexico, Nevada, Utah, Wyoming, and Montana. High temperatures will be near 100 degrees in the northern California valleys, and up to 120 degrees in the desert Southwest. The remainder of the west will have high temperatures in the 80's and 90's. Fire activity at current levels is expected to continue in most areas of the West.
