Subject: VirusScan Update

The next time McAfee's VirusScan updates the "dat" files it may request that the computer be rebooted. Please do so when prompted. There are a few viruses that are active right now that are causing problems in a number of places.

On a related note, if you see a message that resembles this:

Hi! How are you?
[middle line]
See you later. Thanks

Where [middle line] resembles one of these:

I send you this file in order to have your advice
I hope you like the file that I sendo you
I hope you can help me with this file that I send
This is the file with the information you ask for

Then just delete the message and inform the person you received it from that they may possibly have a virus. While you are at it, you might want to update your virus checking software on your home computer.

If you pull a "whoopso" here at work and launch the attachment that came with the above message just because you wanted to test our virus software, please call User Support...especially if it failed. Thanks.

-Brian.
