### A497
**Lat:** 67.11  
**Lon:** 151.40  
**Legal:** 027.0N 019.00W 12 F  
**Name:** Death Valley  
**Date Started:** 7/22  
**Date Out:**  
**Option:** MODIFIED  
**Area:** TAD  
**Owner:** STA  
**Admin:** L&W  
**Status:** Acres: 10.0  
**Cause:** Lightning  
**Narrative:** The fire was not monitored.

### A495
**Lat:** 67.04  
**Lon:** 146.35  
**Legal:** 026.0N 005.00E 23 F  
**Name:** Venetie #1  
**Date Started:** 7/21  
**Date Out:**  
**Option:** UNPLANN  
**Area:** UYD  
**Owner:** NCA  
**Admin:**  
**Status:** Acres: 10.0  
**Cause:** Lightning  
**Narrative:** 2100: Crews gridded the south and west perimeter areas, mopping up hot spots. The fire will be gridded again on 7/25, with tentative demobe scheduled for late 7/25.

### A490
**Lat:** 64.16  
**Lon:** 155.34  
**Legal:** 014.0S 017.00E 19 K  
**Name:** Long Creek  
**Date Started:** 7/21  
**Date Out:**  
**Option:** LIMITED  
**Area:** GAD  
**Owner:** STA  
**Admin:** L&W  
**Status:** Acres: 900.0  
**Cause:** Lightning  
**Narrative:** Detection aircraft 31L flew over the fire at 1540 hours. In the late afternoon, the fire made a significant run eastward aided by sustained winds, rising slope, and continuous black spruce. Firefighters initiated a small burn out to successfully defend a cabin. Safety considerations and the lack of natural barriers limited efforts to defend an allotment further to the east, but increasing relative humidity reduced fire activity considerably as the fire approached the allotment. The fire was mapped (900 acres) by aerial observation prior to the evening’s fire advances.

Narrative: The fire was not monitored.

Narrative: The fire was not monitored.

Narrative: The fire was not monitored.

Rain, cloud-cover, and high humidities helped moderate the fire behavior today. Helicopters are shuttling crews into potential problem areas. Six crews are working to secure the fire perimeter which is expected to take about four days.

Narrative: 1530 hrs.: Surveillance aircraft 309VS reported the fire was creeping and smoldering on all sides under the influence on a strong southwest wind. There were light rain showers in the area and little activity compared to the last two days. The flank closest to the structures on Deadfish Lake showed no activity.

Narrative: Detection 31L flew the fire at 1825 hours. There was no activity nor acreage gain.

Narrative:

**A473**

Detection 31L flew fire at 1845 hours. No activity nor acreage increase observed.

**A472**

Detection 31L flew fire at 2040 hours. No activity nor acreage increase observed.

**A471**

Detection 31L flew fire at 2050 hours. No activity nor acreage increase observed.

**A468**

Detection 31L flew fire at 2050 hours. No activity nor acreage increase observed.

**A467**

Detection 31L flew fire at 2100 hours. No activity nor acreage increase observed.

**A465**

Detection 31L flew fire at 2110 hours. No activity nor acreage increase observed.

**A464**

Detection 31L flew fire at 2115 hours. No activity nor acreage increase observed.

**A463**

Detection 31L flew fire at 2120 hours. The fire was observed backing into a northwest 5-10 mph wind. It was running in tundra to the north and northeast. Currently, the fire is being held by a creek running northeast to the southwest. One area on the southern perimeter is creeping in black spruce.

**A462**

The fire was not monitored.

Narrative:

- The fire was not monitored.
- Detection 31L flew fire at 1800 hours. The fire was creeping and backing on the northern perimeter in black spruce. There was no activity on the spot fire to the south nor on any other section of the perimeter. No acreage gain.
- The fire was not monitored.
- 1800: I.C. reported the fire had received .75 in. of rain at 1630. The crew mopped up hot areas. Eight smokejumpers were demobilized to Fairbanks.
- 1635 hrs.: Surveillance aircraft 309VS reported the tail of the fire (south and west sides) was quiet. The head of the fire was burning in tundra and some intermittent black spruce. There were 1 to 2 foot flame lengths but no significant rate of spread. (note change in acreage)
- The fire was not monitored.
- Fire not flown due to higher priority fires, and limited aviation resources.
- Fire flown by detection aircraft 7031L at 1750 hrs. The fire was smoldering in one spot on the southeast finger.

Narrative: 1620 hrs.: Surveillance aircraft 309VS reported there was no change to the fire since it was last mapped. The ridge on the northwest corner of the fire was still smoking. One other smoke was observed on the northeast corner of the fire.

Narrative: Helicopter 920 went to East and West Twin Lakes to do maintenance on the structure protection equipment. There was wide spread smoke and a trace of precipitation.

1510 hrs.: Surveillance aircraft 309VS reported there was occasional torching under the influence of southwest winds blowing 10 to 15 mph. The entire perimeter between the lakes was fairly active but might be diminished by the light rain in the area. The fire doesn’t appear to have moved much farther up the hardwood hill to the east of West Twin Lake.

Narrative: The area of the fire was mostly smoked in today. A few areas of the fire adjacent to the road flared up today. The engines responded to the flare ups to prevent the fire from crossing the highway and control traffic. A strong southwest wind with gusts to 15 mph kept the fire active. Helicopter 33AL made one surveillance flight of the fire, returned to Fort Wainwright for fuel and then could not make it back to the fire due to smoke conditions.

Narrative: Fire not flown due to higher priority fires, and limited aviation resources.
